Foreword

The Summary Statistics report describes police services and crime trends in British Columbia. It is published every year by the Ministry of Public Safety and Solicitor General. This edition covers the ten-year period from 1995 to 2004, with an emphasis on 2004.

The report summarizes the structure of policing, the type and incidence of criminal activity, the number and distribution of police personnel throughout the province, and the cost of police services. The appendices contain detailed data for individual policing jurisdictions, as well as for the province.

There may be some variance in the data and statistics in this edition of the Summary Statistics report in comparison to previous editions. Where this occurs, the latest edition will reflect the most current data.

More information on police statistics for British Columbia can be obtained from:

Policing and Crime Data Collection in British Columbia

Overview of Policing in British Columbia 13

British Columbia Policing Jurisdictions 17

Overview of Crime Data Collection in British Columbia 23

Overview of Policing in British Columbia

Residents of British Columbia receive police services from an RCMP provincial force, 59 RCMP municipal forces, 11 independent municipal forces, and two First Nations forces (FNAPS). In addition, the RCMP federal force, the Combined Forces Special Enforcement Unit (formerly known as the Organized Crime Agency of British Columbia), and the Canadian National and Canadian Pacific railway police forces also provide law enforcement within the province.

Municipalities with a population exceeding 5,000 persons are responsible for providing police services within their boundaries. These municipalities may contract with the RCMP to provide municipal policing or they may form an independent (non-RCMP) municipal force. The RCMP provincial force polices municipalities with a population below 5,000 persons, as well as unincorporated (usually rural) areas.

Provincial and municipal RCMP detachments provide police services to specific geographic locations within the province as do the independent municipal forces and the First Nations forces. A municipal, a provincial or a First Nations force polices each area in the province. A complete list of municipal, provincial and First Nations policing jurisdictions is provided at the end of this section.

RCMP Provincial Force

The RCMP provincial force serves unincorporated areas as well as 86 municipalities with populations below 5,000 persons. In 2004, the provincial force had an authorized strength of 1,753 officers providing police services to a population of 705,601 persons.

The cost of the provincial force is shared between the federal and provincial governments under the terms of the Provincial Police Services Agreement. The province pays 70% of the contract costs while the federal government pays the remaining 30%. Municipalities with a population of less than 5,000 do not make a direct contribution toward the provincial police services they receive. However, the rural property tax collected by the province from residents in the unincorporated areas serves to offset, to some degree, the cost of policing rural areas.

The RCMP provincial force detachments are usually named after the municipalities in which the detachment offices are located. For example, the Princeton RCMP provincial unit polices not only the Town of Princeton but also the rural areas and other communities contained within the detachment's boundaries.

The RCMP provincial force is also responsible for policing unincorporated areas surrounding municipalities that have populations exceeding 5,000 persons. For example, the Nanaimo RCMP provincial unit is only responsible for policing areas outside the municipal boundaries of the City of Nanaimo since the City is served by a municipal RCMP force.

Where both municipal and provincial units are located in the same detachment, the RCMP members from each unit report to one commanding officer and provide police services to the combined provincial and municipal policing areas.

Municipal Police Forces

Under the Police Act and the Local Government Act a municipality must assume responsibility for its police services when, as a result of a Canada Census, its population reaches 5,000 persons. In 1996, there were 67 municipalities with populations exceeding 5,000 persons. This number increased to 71 in 1997 following the release of the 1996 Canada Census results, and remained at 71 following the release of the 2001 Canada Census results.

As previously mentioned, these municipalities may form their own independent police forces or contract with the RCMP for municipal policing services. In 2004, 12 municipalities have their own police departments, while 59 contract with the RCMP for municipal police services.

Independent Municipal Forces

Twelve municipalities in British Columbia have formed their own police departments. These twelve municipalities are policed by 11 independent municipal police departments. Following the amalgamation of the Victoria and Esquimalt police departments in 2003, these two municipalities are policed by one independent force, the Victoria Police Department.

The 11 police departments are referred to as independent municipal police forces, as each of the municipalities is responsible for 100% of its policing costs. The independent municipal forces include Vancouver, Victoria, Saanich, Central Saanich, Oak Bay, Delta, Abbotsford, New Westminster, West Vancouver, Nelson and Port Moody.

RCMP Municipal Forces

In 2004, there were 59 municipalities with RCMP municipal police services. Each of these municipalities has signed a Municipal Police Unit Agreement with the federal and provincial governments for the provision of RCMP police services to the area within their municipal boundaries. Under this agreement (contract), the cost of policing these municipalities is shared between the municipality and the federal government.

There are two different cost-sharing formulas. Municipalities with populations exceeding 15,000 persons are responsible for 90% of the cost of their RCMP police services. Municipalities with populations between 5,000 and 15,000 persons are responsible for 70% of the cost of their RCMP police services. The federal government pays the remaining 10% and 30% respectively. However, municipalities with RCMP agreements pay 100% of their accommodation and support staff.

Chronology of New RCMP Municipal Forces (1986–2002)

During the 1980s, eight B.C. municipalities exceeded 5,000 population and became responsible for their police services. Rather than establish their own police departments, or contract for municipal police services, it was agreed that the province, through the RCMP provincial force, would extend police services to these municipalities on a fee-for-service basis. In 1992, seven of these "extended" municipalities — Revelstoke, Coldstream, Pitt Meadows, Colwood, North Saanich, Parksville (Oceanside) and Port Hardy — converted to RCMP municipal contracts. The eighth municipality, Fernie, converted in 1994.

The results of the 1991 Canada Census revealed that the population of three municipalities — Sechelt, View Royal and Smithers — had exceeded 5,000 persons. Consequently, these municipalities became responsible for their police services in 1992. Two of the municipalities signed RCMP municipal contracts in 1992 and the third, Smithers, signed a municipal contract in 1994.

In 1993, Qualicum Beach expanded its municipal boundaries and its subsequent population exceeded 5,000 persons. Qualicum Beach entered into a contract for RCMP municipal police services during that year.

In 1994, Langford became incorporated as a municipality with a population exceeding 5,000 and signed a RCMP municipal police services contract.

Overall, between 1992 (when seven of eight extended contracts were converted to municipal contracts) and 1994 (when an eighth extended contract was converted and Langford was incorporated as a municipality) the number of RCMP municipal police contracts rose from 43 to 56.

Between 1995 and 1997, the number of RCMP municipal contracts decreased by two contracts to 54. In 1995, Abbotsford (RCMP municipal force) and Matsqui municipalities amalgamated forming the Municipality of Abbotsford with an independent municipal force. In 1997, Fernie, as a result of the 1996 Canada Census, reverted from an RCMP municipal force to a provincial force jurisdiction.

The results of the 1996 Canada Census resulted in five municipalities — Hope, Ladysmith, Lake Country, Spallumcheen and Whistler — becoming responsible for providing municipal police services. Consequently, the number of RCMP municipal contracts increased to 59.

In 2002, as a result of the 2001 Canada Census, the municipality of Sooke, with a population exceeding 5,000, entered into a contract for RCMP municipal police services while the municipality of Port Hardy, with a population of less than 5,000, reverted from an RCMP municipal force to a solely provincial force jurisdiction.

First Nations Policing

The First Nations Policing Policy, announced in June of 1991 by the federal government, gives First Nations communities the opportunity to participate with provincial and federal governments in the development of dedicate policing services within their communities. The First Nations Policing Policy is designed to give First Nations communities greater control over the delivery and management of policing services within their communities.

First Nations Community Policing Services (FNCPS)

In 2004, there were 45 RCMP officers assigned to First Nations Community Policing Services (FNCPS). These officers serve many aboriginal communities. Each FNCPS unit is established under a tripartite agreement between the province, the federal government and the participating Band. The provincial share of funding the FNCPS is 48% while the federal share is 52%. The program represents an enhancement of the RCMP provincial police service.

Community Constable Program (ACCP)

In those communities where a tripartite agreement has not yet been signed, the RCMP continues to operate its Aboriginal Community Constable Program (ACCP). In 2004, under the ACCP, there were 28 First Nations officers serving a number of aboriginal communities. The province pays 54% and the federal government pays 46% of this cost-shared program.

First Nations Administered Police Services (FNAPS)

There are two First Nations Administered Policing Services (FNAPS) in British Columbia: Stl'atl'imx Tribal Police and Kitasoo-Xaixais Public Safety Department. Two others, Tsewulton and Ditidaht First Nation Public Safety and Policing Services, respectively closed in 2000 and 2004. Each of these police services are modelled on the structure of an independent municipal police department, with governance provided by a police board whose members are selected from the communities served. Police officers recruited by the police boards are either experienced officers or graduates from the Police Academy of the Justice Institute of B.C. All officers are appointed under the Police Act.

Overview of Crime Data Collection in British Columbia

Every police department within British Columbia participates in the Uniform Crime Reporting (UCR) Survey. Managed nationally by the Canadian Centre for Justice Statistics (CCJS), the UCR Survey forms the basis of crime data collection within the province and across the country. The UCR Survey is designed to collect aggregate data on the incidence of crime. It records three major components for each criminal incident: the most serious offence (MSO) within the incident (by type and volume); clearance (by charge or by other means); and persons charged in connection with the offence (by gender and adult/youth).

Statistics Canada, in co-operation with the Canadian Association of Chiefs of Police, developed the UCR data collection system. Although some details of the UCR Survey have been modified since its implementation in 1962, the fundamental aspects of the UCR Survey have remained fairly constant since that time. This publication contains UCR data for the last ten years, 1995 to 2004.

In addition to the UCR Survey, the Ministry of Public Safety and Solicitor General receives more detailed data on specific crime categories such as homicide, sexual assault and spousal assault. These data are collected from three separate, but related, databases including the Operational Statistics Reporting (OSR) System, the UCR2 database and the Homicide database.

The Uniform Crime Reporting (UCR) Survey

Provincially, UCR aggregate data are stored in the Police Management Information System (PMIS) maintained by Police Services Division (PSD). The PMIS contains data from 1977 onward. The data are updated monthly and quarterly.

Policing jurisdictions in B.C. perform periodic reviews or audits to ensure their crime data are recorded accurately. PSD also monitors this data to identify any discrepancies. As a result, the UCR data contained in this report are considered to accurately represent B.C.'s crime trends.

The collection, analysis and explanation of crime data can be complex due to the diverse ways in which the data can be examined. Different data collection systems produce different findings of the same series of events because the data reflect the definitions that are used and the manner in which information is gathered.

The UCR Survey records police-reported crime data. As such, UCR data contains only information on those crimes that come to the attention of the police and are reported by the police. UCR crime data does not contain a count of all crimes in B.C.; some crimes are never detected, and some that are detected are never brought to the attention of the police.

Victimization surveys provide data that are complementary to UCR data. These surveys are generally conducted by telephone and involve questions concerning the victimization of respondents. Victimization surveys contain information on a greater number of criminal incidents than the UCR data because victims are asked to describe both incidents they reported to the police and incidents they did not report. Victimization surveys contain methodological features that preclude information on such crimes as homicide and kidnapping, as well as "victimless crimes" (i.e., prostitution and drug offences), crimes committed against commercial or public property, and crimes committed against persons under sixteen years of age.

UCR Survey Rules

The police occurrence report forms the basis of data collection for the UCR Survey. There are standard rules for counting incidents, persons charged and clearance data under the UCR Survey. A review of the most basic UCR Survey rules, and the ramifications of each, are discussed below.

Unfounded Incidents

Reported offences (crimes reported by citizens to the police or crimes otherwise detected by police) are subject to a preliminary investigation by the police to determine the validity of the report. On occasion, a reported offence may not have actually occurred. For example, a vehicle that is reported stolen may turn out to have been borrowed by a family member. These incidents are considered "unfounded" and are subtracted from the number of reported offences to produce the number of actual offences.

In this publication, the number of offences always refers to actual rather than reported offences.

Number of Offences

The total number of UCR offences is not a census of all crimes that are reported by the police. This occurs for two reasons. First, under the UCR Survey, most violent crimes (i.e., attempted murder and homicide, sexual offences, non-sexual assault, abduction) are scored differently from property and "other" crimes (i.e., prostitution, arson, and vandalism, among others). The number of violent offences recorded is equal to the number of victims involved in an incident of violent crime. For example, when one person murders three people, three offences are recorded, whereas when three people murder one person, only one offence is recorded. For all property crimes, other crimes, and the violent crime of robbery, the total number of offences recorded is equal to the number of distinct or separate incidents. For example, in an incident where several vehicles parked in one block are spray-painted with paint from the same spray can, only one incident of vandalism is reported.

The second reason that the total number of UCR offences does not represent the total of all crime reported by the police occurs as a result of the "most serious offence" (MSO) rule. The MSO rule stipulates that where a single criminal incident contains a number of violations of the law, then only the most serious one is recorded for UCR purposes. There are standard rules for determining the most serious offence where crimes in the same incident are of a similar severity. The application of the MSO rule tends to underestimate the true incidence of relatively less serious crimes that come to the attention of the police because these crimes are counted only when they do not occur in conjunction with a more serious crime in the same incident.

In short, the total number of UCR offences represents the number of victims of violent crimes plus the number of separate incidents of property and other crimes.

Clearance

When the police have identified at least one offender in relation to an offence and have sufficient evidence to solve the offence, a Report to Crown Counsel (RCC) recommending charges is completed and forwarded to the local Crown counsel office. Once an RCC is forwarded, the police consider the incident to be cleared by charge and this status is reported in the UCR Survey. This occurs even if the police have not yet apprehended the accused.

In some instances, the police identify an offender and have enough evidence to support a charge but do not recommend charges. Such offences are reported in the UCR Survey as "cleared otherwise"—that is, cleared other than by recommending charges to Crown. Offences are cleared otherwise in specific situations such as the offender is under the age of 12, the victim is uncooperative, the offender has diplomatic immunity, or the offender has been sentenced for other crimes.

Persons Charged

When an offence is cleared by charge, the number of persons recommended for charge by the police is recorded in the UCR Survey. These persons are categorized according to gender and age (adult vs. youth).

The UCR Survey reporting rules dictate that offenders who are simultaneously recommended for charge on more than one offence are counted only once against the most serious offence. In addition, offenders are counted each time the police recommend charges against them (for separate incidents). Consequently, the persons charged data represents a count of the number of persons for whom charges were recommended, rather than a count of the number of separate individuals recommended for charge. As a result, the correlation of persons-charged data with court data is difficult because the UCR Survey does not contain information regarding the total number of recommended charges.

Time Lapse

UCR data are reported monthly by each of the reporting police departments and are available on this basis to interested users. Incidents are recorded in the UCR Survey against the months in which they came to the attention of police, regardless of when the incidents actually occurred. A criminal incident may be solved weeks or months after the incident is recorded in the UCR Survey. Consequently, a one-to-one relationship does not exist between the number of actual offences and the number of cleared offences in any given time frame.

Other Crime Databases

Operational Statistics Reporting (OSR) System

The Operational Statistics Reporting (OSR) System operates within the Police Information Retrieval System (PIRS) and is primarily utilized by the RCMP. The OSR is an incident-based database that stores more detailed information concerning criminal events including characteristics of the accused, victim and offence. In addition, the OSR permits the collection of special survey statistics within the province. For example, these special survey codes are used to identify cases involving spousal assault or child abuse.

Because the OSR contains three of the basic elements of the UCR Survey (i.e., MSO, clearance and persons charged), UCR aggregate data can be extracted from the OSR.

Uniform Crime Reporting Incident-Based (UCR2) Survey

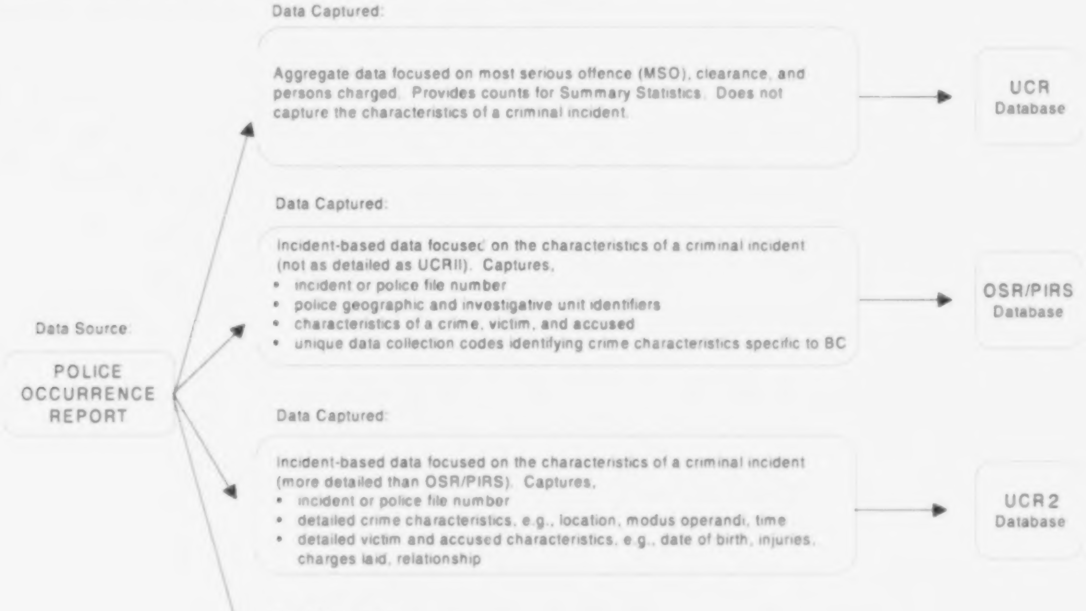
The UCR2 Survey represents an expansion of the UCR Survey. It captures data at the incident level (similar to the OSR) as well as at the accused and victim levels. Examples of the data captured in the UCR2 include detailed crime information (e.g., modus operandi, value of property lost), detailed accused information (e.g., date of birth, charges) and detailed victim information (e.g., date of birth, degree of injury and relationship between the victim and the accused). Because the UCR2 contains three of the basic elements of the UCR Survey (i.e., MSO, clearance and persons charged), UCR aggregate data can be extracted from specific UCR2 fields at the incident and accused levels.

Over 166 jurisdictions in Canada participate in the UCR2 Survey. Prior to 2001, the Vancouver Police Department was the only police force in B.C. which contributed to the UCR2 Survey. In 2001, however, a new integrated records management system suitable for use by all police agencies in the province was developed. This new system called PRIME (Police Records Information Management Environment) is designed to capture all the data elements of the UCR2 Survey. As of 2004, PRIME has been implemented in 20 jurisdictions, and will be rolled out to the rest of the province over the next few years .

The Homicide Survey

All jurisdictions in Canada participate in the national Homicide Survey. Police agencies are required to complete a detailed survey questionnaire for each homicide they report. Aspects of the incident, including characteristics of the victim and accused, are recorded. The Homicide Survey database is administered and updated by the CCJS, and provided to PSD on an annual basis. Once the Homicide Survey data becomes available, it updates and replaces the UCR Survey homicide data.

Chart 1: Sources of Crime Data in British Columbia



Aggregate data focused on most serious offence (MSO), clearance, and persons charged. Provides counts for Summary Statistics. Does not capture the characteristics of a criminal incident.

Incident-based data focused on the characteristics of a criminal incident (not as detailed as UCRII). Captures,
- incident or police file number
- police geographic and investigative unit identifiers
- characteristics of a crime, victim, and accused
- unique data collection codes identifying crime characteristics specific to BC

Incident-based data focused on the characteristics of a criminal incident (more detailed than OSR/PIRS). Captures,
- incident or police file number
- detailed crime characteristics, e.g., location, modus operandi, time
- detailed victim and accused characteristics, e.g., date of birth, injuries, charges laid, relationship

Incident-based data focused on the characteristics of an homicide incident. All jurisdictions in Canada participate in this CCJS Survey. Captures,
- incident or police file number
- police geographic and investigative unit identifiers
- detailed information on the characteristics of an homicide incident, including extensive victim and accused information

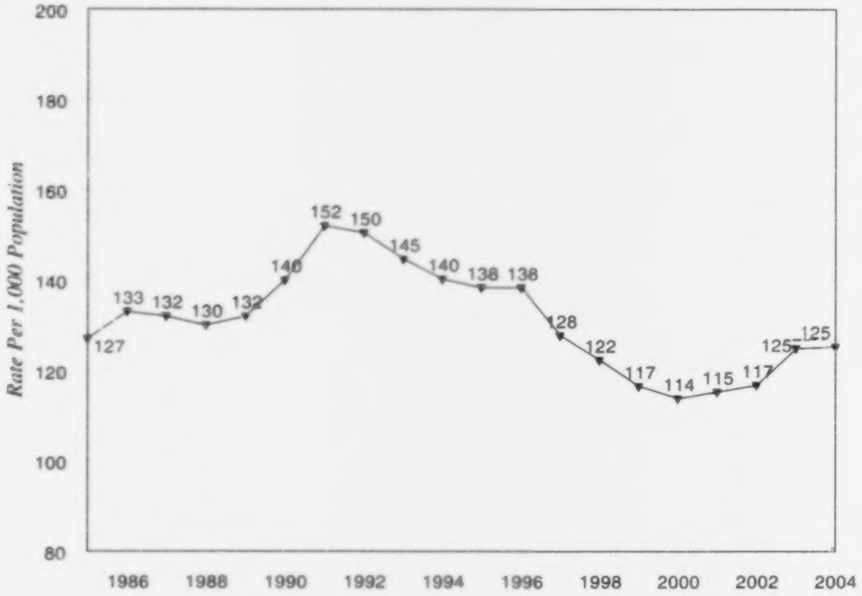
Summary of Crime in British Columbia

In 2004, there were 525,460 (non-traffic) crimes reported in British Columbia. This is 6,803 or 1% more than the 518,657 crimes reported in 2003. The 2004 crime rate was 125.2 offences per 1,000 population. Following a 7% increase in 2003, BC's overall crime rate stabilized in 2004 (rising by less than 1% over 2003's crime rate of 124.9 offences per 1,000 population).

Figure 1: British Columbia Crime Rate, 1985 to 2004.



This chapter provides a brief description of the number and types of Criminal Code offences, municipal and provincial crime rates, the number of crimes solved, and the number of persons charged in British Columbia. At the end of the chapter there is a discussion of youth crime.

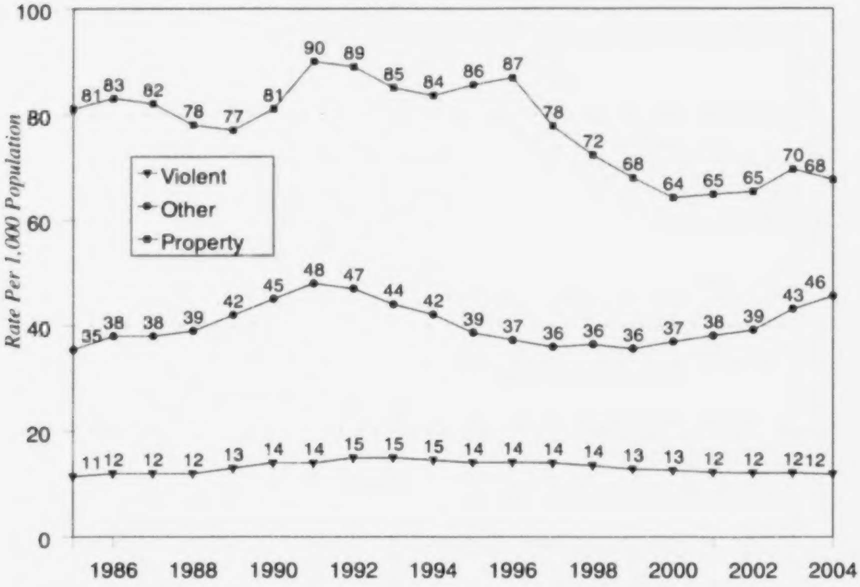
In Chapters 2, 3 and 4, the characteristics and trends of various Criminal Code offences are discussed in more detail. In Chapters 5 and 6, those offences arising from federal drug statutes, and Criminal Code and provincial traffic statutes are discussed.

CRIME RATES

The crime rate is the number of Criminal Code offences reported for every 1,000 people. It is often a better measure of trends in crime than the actual number of offences because it allows for population growth.

After peaking at a high of 152 Criminal Code offences per 1,000 population in 1991, B.C.'s crime rate decreased steadily over the next 10 years to a low of 114 crimes per 1000 population 2000. Between 1991 and 2000, B.C.'s crime rate declined by 25%.

Figure 2: British Columbia Crime Rate by Category, 1985 to 2004.



In 2004 there were 525,460 reported Criminal Code offences, 6,803 more than reported in 2003.

In 2004, B.C's crime rate stabilized at 125 crimes per 1,000 population following an increase of 9% increase from 2001 to 2003, the first substantial increase in over a decade. It is important to note that B.C.'s 2004 crime rate is still one of the lowest reported in the province in over 20 years.

Fluctuations in the crime rate are quite often the result of changes in the number of property crimes. As shown in Figures 2 and 3, property offences have a major impact on the crime rate as they account for 54% of total reported crime. The property crime rate rose 8% between 2000 and 2003, after declining by 23% between 1994 and 2000. In 2004, B.C.'s property crime rate decreased by 3%. Increases in other crimes also influenced the overall crime rate (the types of crimes captured within this category are referenced on Page 67). Other crimes accounted for 36% of all crimes in 2004 and over the past 5 years the other crime rate has increased by 24%.

B.C.'s crime rate is traditionally higher than the national average. In 2004, with the exception of Saskatchewan and Manitoba, B.C.'s overall crime rate was higher than any other province. Although B.C.'s crime rate is often historically higher than the rest of the country, trends detected in the national crime rate data are frequently paralleled in B.C. (Please note this report does not include detailed comparisons with other provinces. National data are available from the Canadian Centre for Justice Statistics, Statistics Canada).

Factors Impacting on Crime Rates

A multitude of factors are believed to affect the crime rate. Examples of these factors include:

Demographics - Demographic shifts, or changes in the size and rate of the offenders group, are believed to have an impact on crime rates. For example, changes in that age and gender structure of a particular population, specifically males aged 16 to 24 years (the age group most likely to commit crimes), can influence crime rates. Level of income and education are also demographic characteristics that may affect crime rates.

Technological Change - Criminal activity has been changing rapidly over the past decade. With continual advances in technology, opportunities for new, more complex crimes have been developed, creating new challenges for law enforcement.

Influences on police enforcement practices – Policy decisions (such as the introduction of measures to deal with violence against women and children) or legislative changes (such as the introduction of the Youth Criminal Justice Act) can affect the reporting of some types of crimes and impact on crime rates.

Victim Response to Crime - Some experts argue that victim responses to crime cause cyclical patterns in the crime rate. When crime rates are rising, potential victims take self-protective measures, causing crime rates to moderate. Conversely, when crime rates are stable or decreasing, self-protective measures also decline, creating opportunities for criminal behaviour to increase again.

Community-Based Policing - Other experts argue that community-based policing initiatives (i.e., police-community partnerships to solve local crime problems) encourages citizens to come forward and report more incidents to police, thus impacting on crime rates.

Other Factors – Factors such as inflation or economic hardship, and alcohol/drug consumption may also affect crime. Additionally, it has been suggested that population density and changes in public attitude may contribute to fluctuations in the reporting of certain types of crime and impact on crime rates.

It is unlikely that a single factor accounts for changes in crime rates; more than likely a combination of factors are responsible for changes in trends.

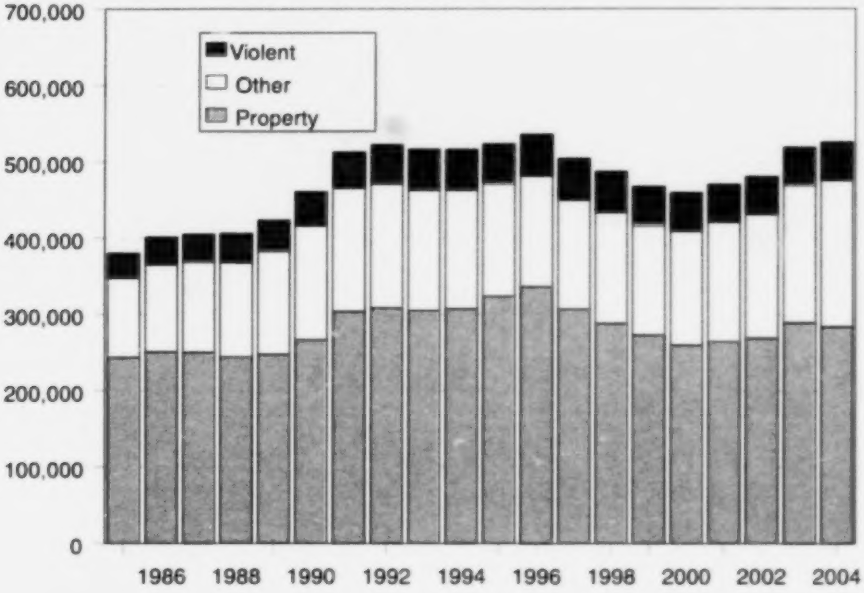
The B.C. crime rate stabilized at 125 offences per 1,000 population in 2004, one of the lowest in over 20 years.

CRIMINAL CODE OFFENCES

Criminal Code offences are divided into three major categories: crimes against persons (or violent crimes), crimes against property and other crimes. These Criminal Code categories do not include drug offences or offences under other federal statutes such as the Customs Act or the Canada Shipping Act. They also do not include offences under provincial statutes such as the Liquor Control and Licensing Act or the Securities Act, nor do they include Criminal Code traffic offences, provincial and municipal traffic offences, or other municipal by-law infractions.

In 2004, crimes against persons (violent offences) represented 10% (50,153) of all Criminal Code offences; crimes against property accounted for 54% (283,790); while the remaining 36% (191,517) were other crimes. These proportions have remained relatively constant over the last decade.

Figure 3: Number of Crimes by Category, 1985 to 2004.



More often than not, a high crime rate indicates that a municipality is a core city or tourist destination.

In 2004, there were 525,460 Criminal Code offences reported, 6,803 or 1% more than in 2003 and 44,972 or 9% more than in 2002. Between 1991 and 2001, the volume of crime in BC, similar to the crime rate, decreased by 10% (from 512,695 offences to 459,609). Since 2000, the number of Criminal Code offences reported has increased by 14% or approximately 66,000 offences. Overall, the volumes of crime reported over the past four years are comparable to those reported a decade ago.

Municipal Crime Rates

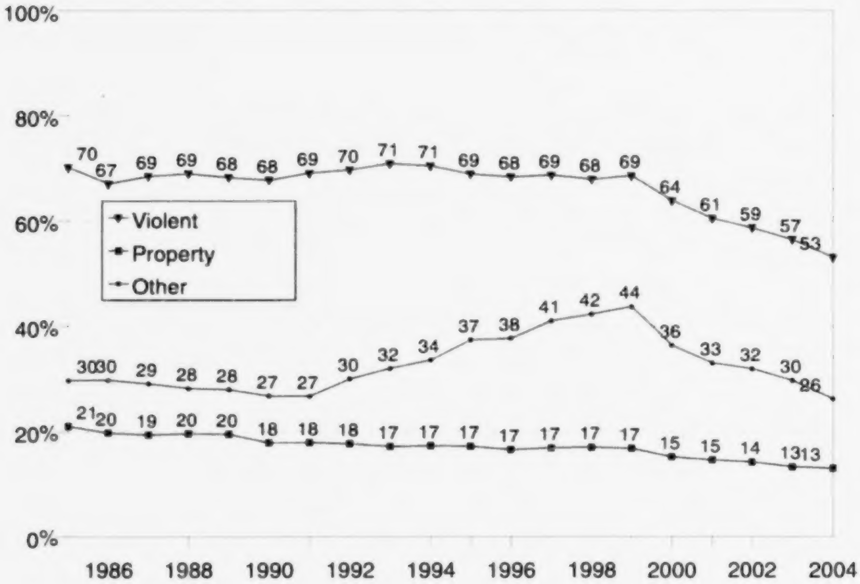
In 2004, municipal crime rates (the number of crimes per 1,000 resident population in a particular municipality) ranged from a low of 35 to a high of 279 Criminal Code offences per 1,000 population. The average crime rate for municipalities in British Columbia in 2004 was 135 crimes per 1,000 population.

Municipal crime rates do not necessarily reflect the relative safety of one municipality over another. More often than not, a high crime rate indicates that a municipality is a "core" city or tourist destination. Core cities are usually surrounded by urban or unincorporated areas which have significant residential populations. These cities are the business and entertainment centres for a large number of people who reside outside as well as inside the municipality. Tourist destinations often have large "part-time" populations relative to their resident populations. Part-time populations include tourists, vacation home owners, students or seasonal staff.

A municipal crime rate is based on the resident population of a municipality. If a person from outside a municipal boundary enters and commits a crime, that crime is attributed to the municipality in which the crime was committed. Since the person does not reside within the municipality, he or she is not included in the municipal resident population. Consequently, core cities and tourist destinations often have higher than average crime rates. If core cities expanded their boundaries to include the residential areas outside their borders, crime rate for the combined populated area would be considerably lower than the municipality itself. Similarly, if tourist destinations included part-time residents in their population base, their crime rates would be substantially lower.

Although municipal crime rates cannot be used to measure the relative safety of one location over another, they can be used as an indication of the trend in crime in each municipality. If two municipalities share similar characteristics, comparing their actual crime rates may be valid. However, these comparisons should be made with caution.

Figure 4: Percentage of Crimes Cleared 1985 to 2004.



In 2004, police solved (cleared) 22% of all reported Criminal Code offences.

Crimes Cleared (Solved)

When police solve an offence, they record whether it has been cleared by charge or cleared by other means. An offence is defined as *cleared by charge* when the police file a Report to Crown counsel (RCC) recommending charges. An offence is defined as *cleared by other means* when the police have identified an offender and have enough evidence to support a charge, but for a variety of reasons do not recommend a charge. Offences can be cleared by other means under specific circumstances. These include situations where the victim is uncooperative, or the offender is either dead, or under 12 years of age, has diplomatic immunity or was previously sentenced. Police can also clear offences by other means in discretionary situations where they do not proceed with charges even though the offender has been identified and they have sufficient evidence to proceed.

In 2004, 22% (113,728) of all reported Criminal Code offences were cleared (solved). Approximately 12% (60,657) were cleared by charge, and 10% (53,071) were cleared by other means. The remaining 78% (411,732) of offences remained unsolved.

The clearance rate is the number of crimes solved by police as a percentage of the number of crimes reported to police. There is a considerable difference in the clearance rates for violent crimes compared with property and other crimes. In 2004, 53% (26,651) of violent crimes were cleared as opposed to only 13% (36,994) of property crimes and 26% (50,083) of other crimes.

From 1993 to 1999, the percentage of violent crimes cleared remained relatively stable, ranging from 68% to 71%. During the last five years, however, the violent crime clearance rate decreased an average of 5% annually, from 64% in 2000 to 53% cleared in 2004.

The property crimes clearance rate remained stable at 17% between 1993 and 1999. Between 2000 and 2003, the property crime clearance rate decreased to 13%; in 2004 this rate remained at 13%.

The clearance rate for other crimes had steadily increased from a low of 34% in 1994 to a high of 44% in 1999. In 2000, the other crime clearance rate dropped to 36% and continued to decline to 26% in 2004.

In 2004, of the 59,229 persons recommended for charge, 89% were adults and 11% were young offenders.

Persons Charged

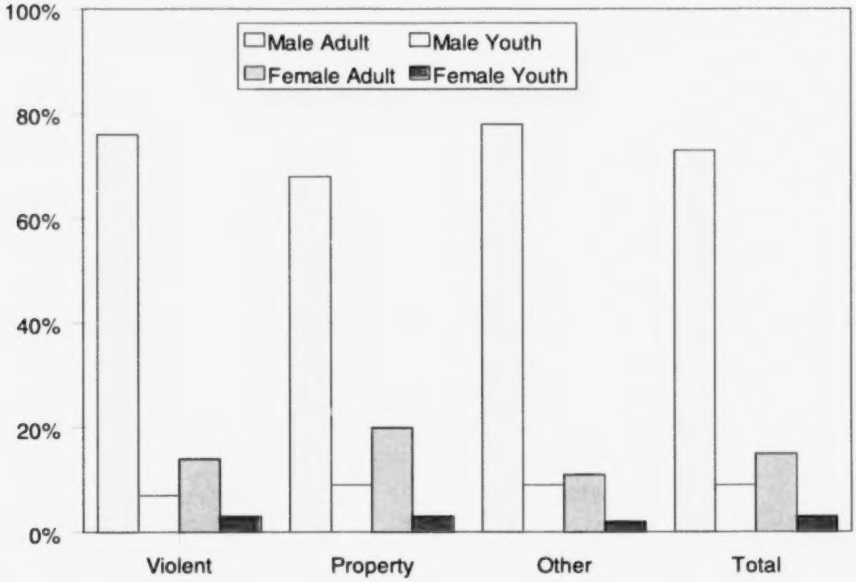
In 2004, the police reported that 59,229 persons were charged with Criminal Code offences in British Columbia. Since Crown counsel determines whether a charge will be laid, this figure actually represents the number of persons *recommended* for charge by the police.

Of the 59,229 persons charged, 30% (17,892) were charged with crimes of violence, 40% (23,882) with property crimes, and 30% (17,455) with other crimes. By comparison, violent crimes represent only 10% of reported crime, property crimes represent 54% of reported crime, and other crimes represent 36% of reported crime.

Persons charged data are divided into four categories: adults, male and female; and youths, male and female. In Canada, a young offender (youth) is between 12 and 17 years of age and an adult offender is 18 years and older. In 2004, of the 59,229 persons recommended for charge, 11% (6,703) were young offenders and 89% (52,526) were adults.

In 2004, approximately 83% (43,459) of the 52,526 adults charged and 76% (5,112) of the 6,703 youths charged were male. These proportions have remained constant over the last decade.

Figure 5: Persons Charged in B.C. by Gender and Type of Offence, 2004.



In 2004, adults represented 90% (16,084) of persons charged with violent crimes, 88% (20,942) of persons charged with property crimes and 89% (15,500) of persons charged with other Criminal Code offences. Young offenders represented 10% (1,808) of persons charged with violent crimes, 12% (2,940) of persons charged with property crimes and 11% (1,955) of persons charged with other Criminal Code offences.

Youth Crime

In B.C., as in the rest of Canada, young persons between the ages of 12 and 17 who break the law are subject to the same charges as adults. There is no offence known as youth crime; rather the determination that an accused person is a young offender is based on the age of the offender at the time the offence was committed.

Detecting the real extent of youth involvement in crime is difficult. The data discussed below are based on the number of youths charged with criminal offences, i.e., the number of youths for whom the police submitted a report to Crown counsel. Unless the police solve the offence, it is not known whether an adult or youth committed the crime. Therefore, data on youth crime are dependent on the identification of the offender by the police. For the purposes of this publication, it is assumed that the youth charged data (the number of Criminal Code charges reported per 1,000 population between the ages of 12 and 17) provide an indication of trends in youth involvement in crime.

There is no offence known as youth crime; rather, the determination that an accused person is a young offender is based on the age of the offender at the time the offence was committed.

Legislative Changes Dealing With Young Offenders

On April 1, 2003, the Youth Criminal Justice Act (YCJA) replaced the Young Offenders Act. The new legislation is primarily aimed at differentiating between violent or repeat offenders, and first-time offenders who commit non-violent or less serious crimes. The YCJA stipulates sentencing based on the seriousness of the crime and encourages sentencing which is community based (i.e., victim compensation, community service and supervision). In addition, the Act provides for the imposition of adult sentences as well as rehabilitative custody and supervision sentences in the case of violent and high-risk offenders.

Youth Crime in 2004

In 2004, 73% of the criminal offences for which young people were charged were non-violent crimes.

In B.C., there were 6,703 young offenders charged with Criminal Code offences in 2004, 1,028 or 14% less than in 2003. This represented a youths charged rate of 21 charges per 1,000 youths, an overall decrease of 13% from the youths charged rate of 24 recorded in 2003.

Approximately 73% (4,895) of the criminal offences for which young people were charged were non-violent crimes (i.e., property or other crimes). The remaining 27% (1,808) of charges against youths were for violent crimes.

Youths represented 11% (6,703) of total persons charged in 2004. Of those youths charged, 27% (1,808) were charged with violent offences; 44% (2,940) were charged with property offences; and 29% (1,955) were charged with other Criminal Code offences.

Substantially more male youths are charged with Criminal Code offences than female youths. In 2004, slightly more than 75% (5,112) of the youths charged with Criminal Code offences were male.

Youth Crime Trends

During the last ten years, the total population of B.C. youths increased by 9% from 296,193 in 1995 to 322,162 in 2004. During this period, the proportion of youths in the province has, however, remained relatively stable at approximately 8% of the total population.

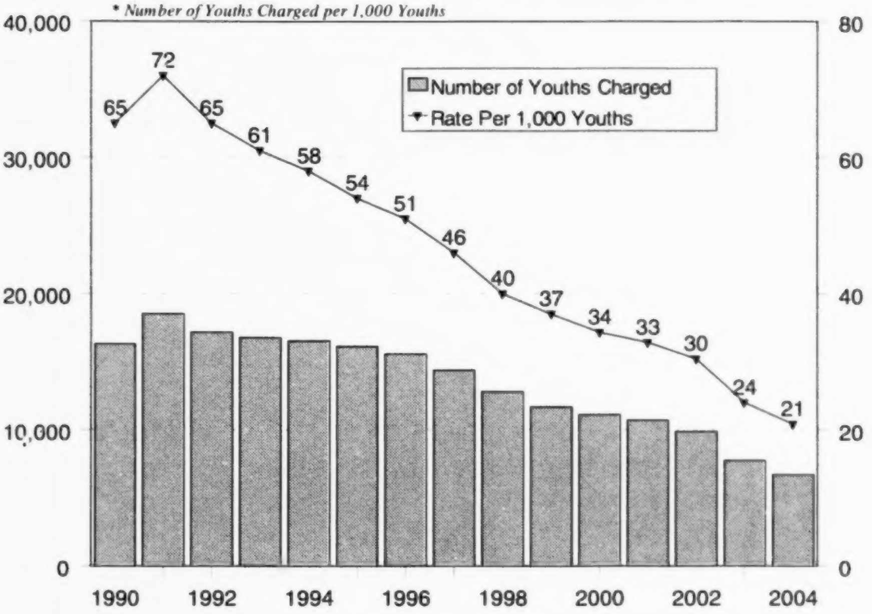
In 1991, the youths charged rate peaked at 72 youths charged per 1,000 youths. Since that time, B.C. has experienced a downward trend in youths charged rates. During the past decade, the youths charged rate has decreased 61% from 54 youths charged per 1,000 youths in 1995 to 21 in 2004. There were 6,703 charges against youths in 2004 compared with 16,128 charges in 1995, a similar decrease of almost 60%.

The youth violent-charge rate steadily increased subsequent to the implementation of the Young Offenders Act in 1985 to a peak of 11 charges per 1,000 youths in 1994. From 1995 to 1998, the youth violent-charge rate stabilized at an average of 10 charges per 1,000 youths. Between 1999 and 2004, however, it decreased from 8 charges per 1,000 youths to 6 charges per 1,000 youths, respectively. Crime data over the past ten years indicate that, on average, youths charged with level 1 non-sexual assault (the least serious assault category) represented almost 50% of B.C. youths charged with violent crimes. It is increases or decreases in this category of crime that largely contributes to fluctuations in the youth violent-charge rate.

In 2004, youths represented 10% of persons charged with violent crimes.

Figure 6: Youths Charged, Number & Charge Rates, 1990 to 2004.*

** Number of Youths Charged per 1,000 Youths*



The number of female youths charged in B.C. peaked in 1995 with 3,846 charged and has been falling since that time reaching a low of 1,591 female youths charged in 2004; a decrease of almost 60%. Similarly, the number of male youths charged in B.C. peaked in 1994 with 12,841 charged. Since that time, the number of male youth charged has declined to 5,112 male youths charged in 2004, also a 60% decrease.

Violent Crime in British Columbia

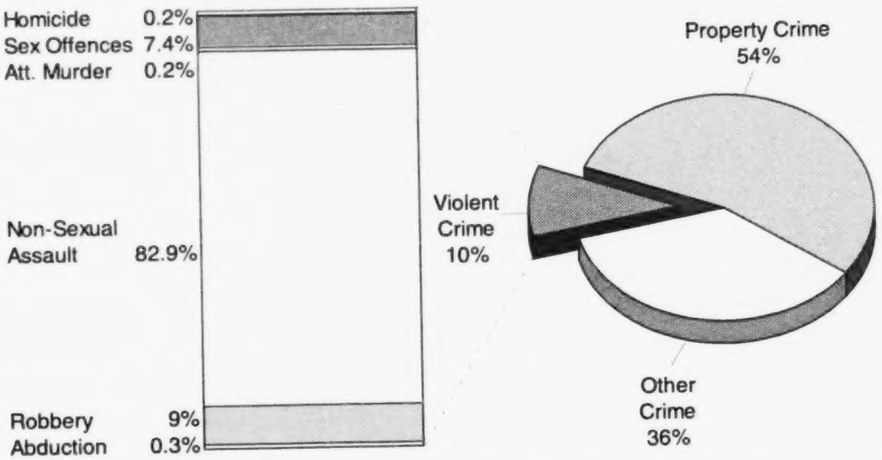


Figure 7: Violent Crime by Category, 2004.

Crimes against persons, more commonly called violent crimes, are considered the most serious of the three Criminal Code offence categories. Approximately 10% of all crime reported during 2004 was categorized as violent. These crimes include homicide, attempted murder, sexual and non-sexual assault, robbery and abduction. Crimes in this category carry the maximum penalty under the law.

Violent Crime in 2004

There were 50,153 violent offences in 2004, 246 less than the 50,399 violent offences reported in 2003, resulting in a less than 1% decrease in the number of violent crimes and a 1% decrease in the violent crime rate (from 12.1 violent crimes per 1,000 population in 2003 to 12.0 violent crimes per 1,000 population in 2004).

More violent crimes are cleared (solved) than any other type of crime. In 2004, 53% (26,651) of violent crimes were cleared as opposed to only 13% (36,994) of property crimes, and 26% (50,083) of other crimes. Not only are more violent crimes cleared than any other type of crime, but these crimes are more likely to be cleared by charge. In 2004, 36% (18,050) of violent crimes were cleared by charge, whereas 8% (22,299) of property crimes and 11% (20,308) of other crimes were cleared by charge.

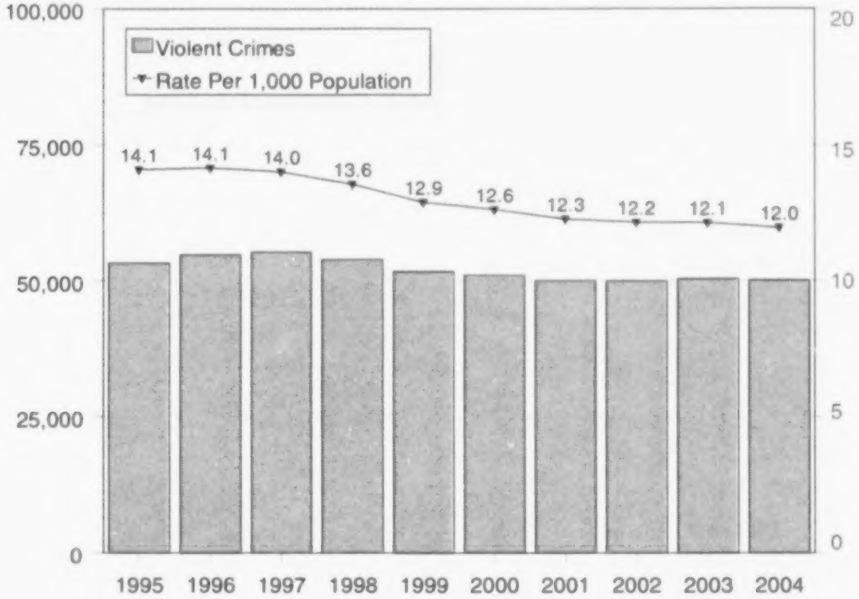
Of the 17,892 persons charged with violent offences in 2004, 76% (13,623) were adult males, 14% (2,461) were adult females, 7% (1,313) were male youths and 3% (495) were female youths.

Violent Crime Trends

After peaking at 55,326 offences in 1997, the number of violent crimes decreased annually at a rate of 2% per year until 2003 when the number of violent crimes increased slightly for the first time in six years. In 2004, the number of violent crimes decreased by less than 1% to 50,153 offences.

While the number of violent crimes has declined over the past decade, the number reported in 2004 is still almost 10% higher than twenty years ago.

Figure 8: Number and Rate of Violent Crimes, 1995 to 2004.



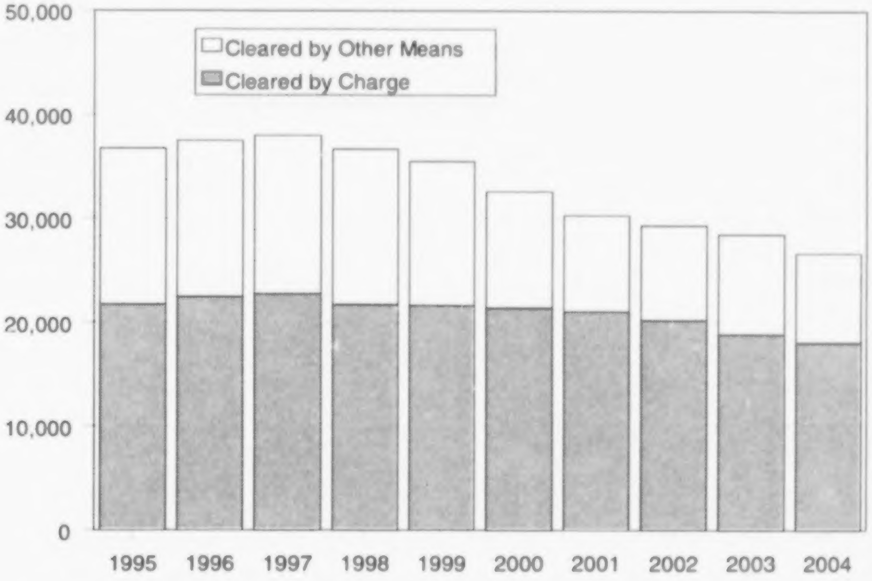
While the volume of violent crime offences fluctuated over the past decade, the violent crime rate continually decreased. It fell from 14.1 violent crimes for every 1,000 persons in 1995 and 1996 to 12.0 in 2004, an overall decrease of 15%. As with the number of violent crimes, the violent crime rate, while decreasing over the past decade, is still almost 10% higher than 20 years ago.

It is important to note that increases in violent offences over the past twenty years might be due to factors other than an increase in the number of these crimes being committed. Changes to federal legislation concerning sexual and non-sexual assault have likely had an impact on the reporting of these offences. Under the revised legislation the previous categories of assault and battery were merged into one offence, and the types of assault reorganized into a three-tiered system of offences based on the seriousness of harm and violence. Moreover, procedural changes to the legislation enhanced the ability of police to make arrests and recommend charges. Heightened public awareness and reduced tolerance of violence may also have led to increased reporting of violent crimes. Finally, the stigma of being victimized may be less pronounced today than previously. As a result, crimes of violence that occurred in the past are being reported and recorded in the present.

Despite the overall increase in violent crime during the past 20 years, within the past decade, there have been decreases in the categories of homicide, attempted murder, sexual offences and robbery (although generally decreasing the number of abductions increased by 45% from 89 offences in 2003 to 129 offences in 2004). In total, the number of offences reported within these categories declined by 27% from 11,621 in 1995 to 8,432 in 2004, primarily driven by a decline in the number of reported sexual assault offences, as well as a substantial decrease in robbery offences. During this period, however, the remaining violent crime category of non-sexual assaults has remained relatively stable for seven of the past ten years at just over 41,000 offences.

Increases in reported violent offences over the past 20 years may be due to factors other than an increase in the number of these crimes being committed.

Figure 9: Number of Violent Crimes Cleared (Solved), 1995 to 2004.



From 1995 to 2004, the number of sexual offences reported declined each year for an overall decrease of 31% between 1995 and 2004. This included a decrease of 33% in level 1 sexual assaults reported, a 29% decrease in level 2 sexual assaults (those involving a weapon or serious bodily harm), and a 48% decrease in the number of level 3 aggravated sexual assaults.

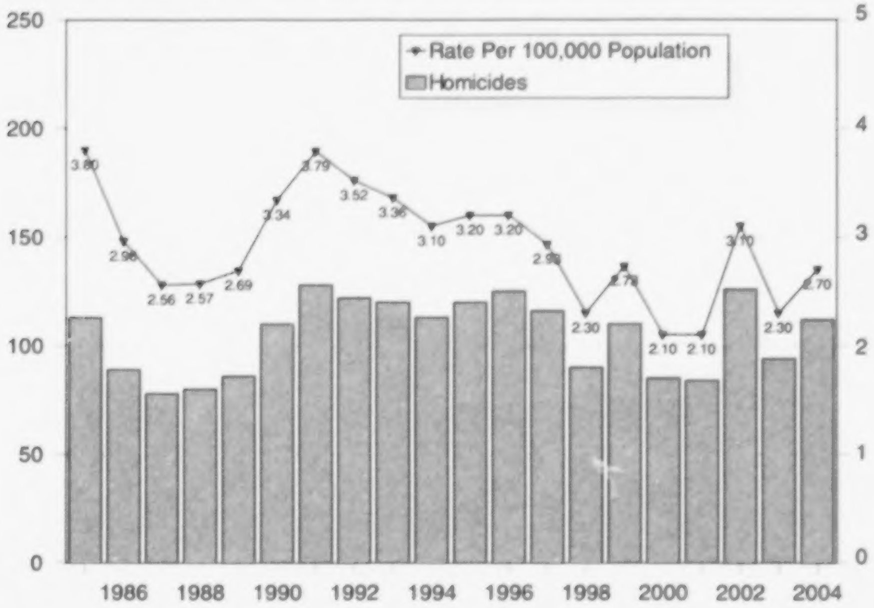
The overall decline in violent crimes has been offset by the relative stability in the number of level 1 assault offences reported. Over the past 10 years, the number of level 1 assault offences has averaged approximately 34,000 each year. Level 1 assault represents two-thirds of violent crime reported and is the major driver of violent crime rates.

The number of persons charged with violent crimes has decreased by 16% in the last ten years. In 2004, 17,892 persons were charged with violent offences compared with the 21,227 persons charged in 1995.

Homicide

In Canada, homicide offences are classified into four categories as defined by the Criminal Code: first degree murder, second degree murder, manslaughter and infanticide. First degree murder occurs when the death is planned and deliberate, or occurs during the commission of another serious offence or when the victim is a peace officer. Second degree murder is all murder that is not in the first degree. Manslaughter is generally a homicide committed in the heat of passion. Infanticide occurs when a mother causes the death of her newly born child. Deaths caused by criminal negligence, suicide, accidental or justifiable homicide are not included in the criminal homicide classification.

Figure 10: Number and Rate of Homicides, 1985 to 2004.



There were 112 victims of homicide reported in 2004.

Homicide in 2004

In 2004, there were 112 homicide victims in B.C., 18 more than the number reported in 2003. This represented a 19% increase from 2003. It is important to note that the 126 homicides reported in 2002 included 15 homicides that were known to have occurred in previous years but were not recorded until 2002.

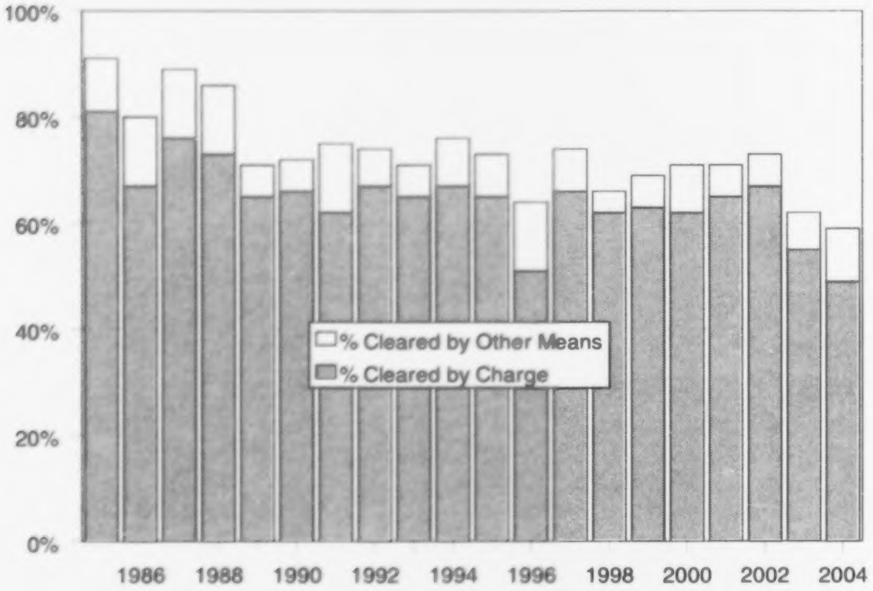
An average of 106 homicides have been reported in B.C. over the past decade, ranging from a high of 126 recorded in 2002 to a low of 84 reported in 2001. The 112 homicides reported in 2004 was within this range.

Of the homicides reported in 2004, 59% (66) were first degree, 34% (38) were second degree and 7% (8) were manslaughter. There were no reported infanticides in 2004.

Since the number of homicides calculated per 1,000 population is fractionally small, homicide rates are calculated on a per 100,000 population basis. In 2004, the homicide rate was 2.7 homicides per 100,000 population, equalling the ten year average of 2.7 homicides per 100,000 population.

Police cleared (solved) 59% (66) homicides in 2004, 49% (55) were cleared by charge and 10% (11) were cleared by other means. Over the past decade, homicide clearance rates have fluctuated between 59% and 73%. Caution should be used when interpreting homicide clearance rates. Homicides may be solved many months or years after the year in which the homicide was reported. As a result, the number of homicides reported and the number of homicides cleared for a specific year are not necessarily linked.

Figure 11: Percentage of Homicides Cleared, 1985 to 2004.



Police charged 61 persons with homicide in 2004.

There were 61 persons charged with homicide in 2004, 85% (52) were male adults, 10% (6) were female adults, and 5% (3) were male youths. As in previous years, the large majority, 90% (55), of persons charged with homicide were male and only 5% (3) of persons charged were young offenders.

Of the 112 homicides in 2004, just under half (52) were killed by someone they knew. When the victim was killed by someone he or she knew, 4% (5) were killed by their spouse or ex-spouse, 9% (10) were killed by a family member other than a spouse or ex-spouse, and 33% (37) were killed by an acquaintance or friend.

In 2004, 71% (80) of homicide victims were male and 29% (32) were female. Approximately 80% (91) of the homicide victims were between the ages of 18 and 54, while 4% (4) of homicide victims were under the age of 18 and 15% (17) were over the age of 55.

Of the total homicide victims in 2004, 35% (39) were killed by shooting, 32% (26) were stabbed, 32% were beaten to death, 4% (5) were strangled or suffocated and 14% (16) were killed other means. Of those victims killed by shooting, three out of four were killed by handguns.

Homicide Trends

Historically there have been more homicides per capita reported in B.C. than in any other province. B.C.'s homicide rate in 2004 was the fourth highest provincial rate in the country. Despite a higher than average homicide rate (the national homicide rate in Canada was 1.95 per 100,000 population in 2004), B.C. trends parallel national trends.

In 2004, the homicide rate was 2.7 homicides per 100,000 population, a 17% increase from the 2003 rate of 2.3 homicides per 100,000 population. During the past 25 years, the homicide rate has fluctuated between 2.1 and 4.4 homicides per 100,000 population. The 2000 and 2001 homicide rates (2.1) were the lowest recorded rates in British Columbia over this time period.

Over the last two decades in British Columbia there have been substantially more male victims of homicide, sometimes up to three times as many as female victims.

Between 1995 and 2004, an average of 68% of all homicides were solved.

Homicide Survey Results

In 1999, Police Services Division conducted a survey of homicide offences in British Columbia, the results of which were released in B.C. Crime Trends Newsletter, Issue #4, (September 2000). Even though each homicide is a unique criminal event, the survey revealed the following characteristics of homicides in B.C.:

- A "typical" murder is committed in a residential home by a male adult between 18 and 34 years of age.
- The victim is a male between 19 and 34 years of age and the homicide is usually precipitated by an assault.
- The accused is a casual acquaintance of the victim.
- The victim will have been either stabbed or shot.
- The police, in most cases, solve the homicide through the laying of charges.

B.C.'s Integrated Homicide Units

In 1996, the provincial government announced the creation of the Unsolved Homicide Unit, an integrated police unit made up of members from the RCMP and the Vancouver Police Department. The purpose of the Unit is to ensure the effective coordination of investigations into unsolved homicides that have occurred over the past 35 years.

The Integrated Homicide Investigation Team (IHIT) was created in 2003. It investigates all homicides, suspicious deaths, police shootings, in-custody deaths and serious attempted murders. IHIT partners include a number of Lower Mainland municipalities.

Attempted Murder

In 2004, there were 83 attempted murder offences in British Columbia. This is a 31% decrease from the 121 offences reported in 2003 and is the lowest number of attempted murder offences reported in the past 10 years. From 1995 and 2004, an average of 105 attempted murders were reported annually in B.C. A high of 136 attempted murders was reported in 1997.

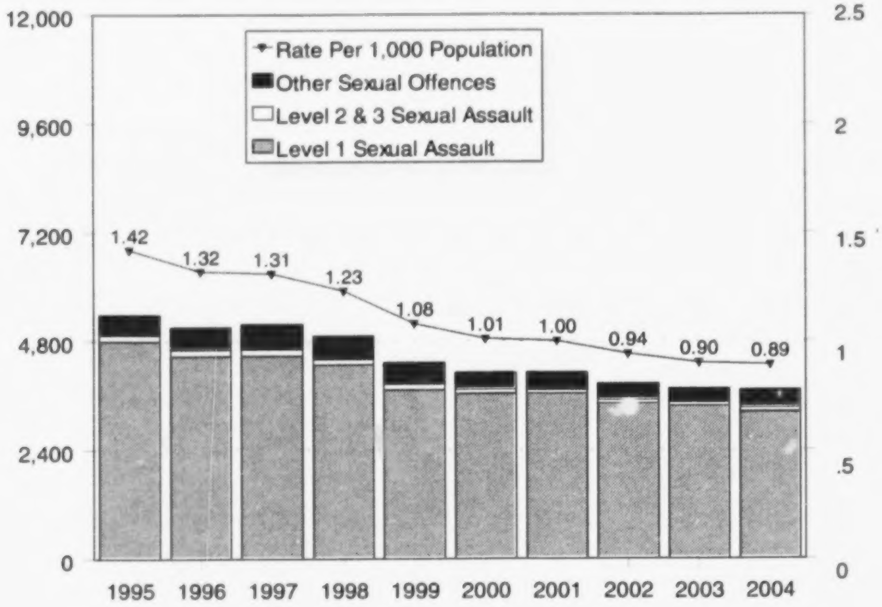
The attempted murder rate in 2004 was 2.0 offences per 100,000 population (as with homicides, attempted murder rates are calculated on a per 100,000 population basis). This is the lowest recorded rate in the past ten years. During this same period, the attempted murder rate has ranged from a high of 3.4 reported in 1997 to a low of 2.0 reported in 2004.

In 2004, 71% (59) of attempted murders were cleared, 93% (55) of these were cleared by charge. On average, the attempted murder clearance rate was 77% over the past decade.

There were 90 persons charged with attempted murder in 2004, 94% (85) of whom were adults. As in previous years, the majority of persons charged (80 or 89%) were male. Only 6% (5) of total persons charged were young offenders.

In 2004, there were 83 attempted murders reported, a 31% decrease from 2003.

Figure 12: Number and Rate of Sexual Offences, 1995 to 2004.



Sexual Assaults and Other Sexual Offences

Law reforms introduced by the Canadian government in 1983 and 1988 served to change the substantive, procedural and evidentiary aspects of Canada's rape law. Under the revised legislation, the crimes of rape, attempted rape and indecent assault were repealed and replaced with a three-tiered system of sexual assault. In addition, new sexual offences were introduced to deal specifically with child sexual abuse (i.e., sexual interference, touching and exploitation).

The three-tiered system of sexual offences is based on the seriousness of harm and violence. Level 1 sexual assault occurs when any form of sexual activity without bodily harm is forced upon another person; level 2 sexual assault occurs when a person is sexually assaulted by someone who uses or threatens to use bodily harm or a weapon; and level 3 sexual assault occurs when a person wounds, maims, disfigures, beats or endangers the life of a person during a sexual assault.

The intent of the law reforms was threefold: first, to reflect the violent rather than the sexual nature of the offences; second, to expand the opportunities for courts to receive children's testimony in cases of child sexual abuse; and, finally, to broaden the scope of sexual offences by presenting the offences as gender neutral as opposed to offences against females only.

Sexual Assault in 2004

In 2004, a total of 3,719 sexual assaults and other sexual offences were reported in British Columbia, a decrease of 23 offences or less than 1% from the 3,742 offences reported in 2003. The 3,719 sexual crimes reported in 2004 represent the lowest number of sexual crimes reported during the last fifteen years.

The 3,719 sexual crimes reported in 2004 represent the lowest number of sexual crimes reported during the last 15 years.

In 2004, 87% (3,233) sexual crimes reported in B.C. were classified as level 1 sexual assaults, whereas 2% (90) were level 2 and level 3 sexual assaults. Another 11% (396) of the total were other types of sexual offences, such as sexual touching or interference, sexual exploitation and incest.

The sexual offence rate (the number of sexual offences per 1,000 population) in 2004 was slightly less than 1 per 1,000 population. Of the 3,719 sexual crimes reported, 46% (1,715) were cleared, 38% (1,417) by charge and 8% (298) were cleared by other means.

Of the 1,197 persons charged with sexual offences in 2004, 84% (1,005) were male adults, 2% (19) were female adults, 14% (169) were male youths and less than 1% (4) were female youths. These proportions have remained about the same over the last ten years.

Sexual Assault Trends

A ten year trend analysis of sexual offences reveals that the total number of reported offences was highest in 1995 at 5,382 offences and has been declining since that time. Level 1 sexual assaults represent close to 90% of sexual offences reported and is a major driver of sexual assault rates.

Despite the recent decreases, the number of reported sexual offences has grown substantially since the early 1980s, not only in B.C. but also across Canada. The sexual offence rate peaked at a high of 1.8 in 1992 and 1993, but has been steadily declining since that time. Even though the 2004 sexual offence rate of 0.89 per 1,000 population is the lowest rate reported in more than ten years, it is approximately 60% higher than the rate recorded 25 years ago.

Trends in sexual assault offences have likely been influenced by many factors, including higher levels of reporting, changes in societal attitudes toward the reporting of sex crimes, the reporting of historical sexual offences, and changes in federal legislation discussed above.

Sexual Assault Survey Results

Police Services Division conducted a survey of sexual assaults reported to police during 1993 and 1994. The findings of this survey are available in full from Police Services Division's Survey of Sexual Assaults Reported to Police in British Columbia, 1993-1994. The survey revealed the following characteristics of a "typical" sexual assault in B.C.:

- The victim is female under the age of 19 (if under the age of 19 then the victim is likely between the ages of six and 12).
- The accused is male, over the age of 17, and is either a family member or a friend of the victim.
- If the accused is a male relative of the victim, then he is most likely her father or stepfather.
- The offence occurs once or during a period of less than one month, and takes place at the victim's home, the accused's home or a home shared by both.
- Fifty percent of the persons charged with a sexual assault have a previous criminal record; however, the record is not likely for violent or sexual offences.
- The police will clear (solve) the offence, most likely by recommending charges.

Level 1 sexual assaults represent almost 90% of reported sexual offences.

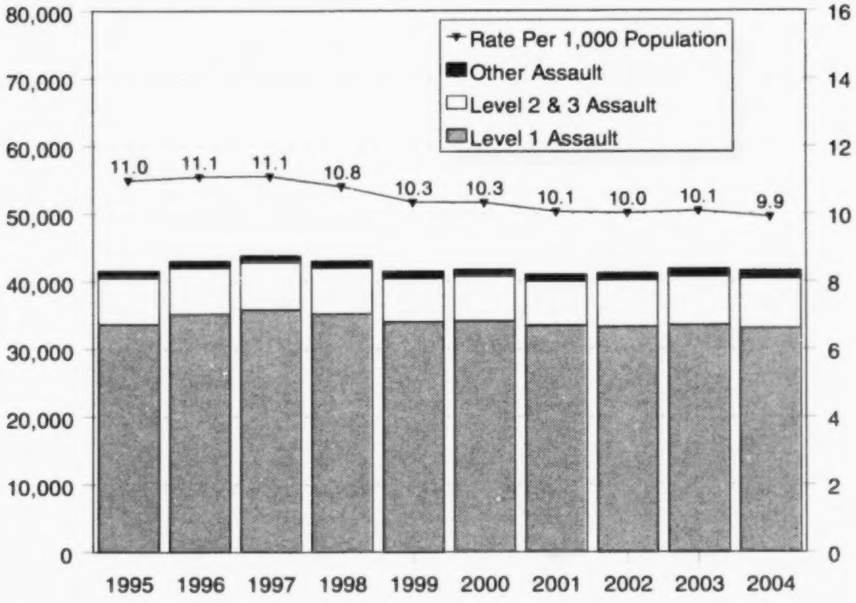
Non-Sexual Assault

Revisions to federal assault legislation established three levels of non-sexual assault offences similar to those provided for sexual assaults. Level 1 non-sexual assault, the least serious of these offences, does not involve a weapon or serious physical injury; level 2 involves a weapon or results in bodily harm; and level 3 is aggravated assault or assault that is life-threatening. The ability of the police to make arrests and recommend charges in all types of assaults was enhanced by these revisions.

In addition to the three levels of assault, non-sexual assaults also include the offences of assaulting a police officer or other officer, shooting with intent (firing a gun, rifle or airgun with the intention of hurting or endangering the life of another person), and causing unlawful bodily harm (any intentional harm to another person by any means).

In 2004, 56% of assaults were cleared (solved).

Figure 13: Number and Rate of Non-Sexual Assaults, 1995 to 2004.



Non-Sexual Assault in 2004

In 2004, 41,592 assaults were reported. This represents a decrease of less than 1% (284 offences) from the 41,876 assaults reported in 2003. Non-sexual assaults accounted for 83% of the 50,153 violent crimes reported in B.C. in 2004.

In 2004, 80% (33,096) of the total number of assaults were classified as level 1, compared with 17% (7,028) as level 2 and 1% (307) as level 3 offences. Other assault offences accounted for the remaining 3% (1,161) of offences.

In 2004, 56% (23,466) of assaults were cleared (solved), 37% (15,305) were cleared by charge and 20% (8,161) were cleared by other means.

Of the 15,145 persons charged with assault in 2004, 91% (13,752) were adults and the remaining 9% (1,393) were youths between 12 and 17 years of age. In the same year, males represented 83% (11,477) of the adults charged and 68% (948) of youths charged.

Non-Sexual Assault Trends

During the past decade, assaults have accounted for four out of five violent crimes. The volume of assaults reported has remained fairly stable averaging 42,050 offences per year for the past ten years, ranging from a high of 43,851 in 1997 to a low of 41,039 in 2001. Overall, the assault rate has declined 10% over the past 10 years, dropping from 10.99 per 1,000 population in 1995 to 9.91 in 2004.

The number of Level 2 and Level 3 assaults, and other assault categories (e.g., assault of a police officer, shoot with intent) combined have increased over the past decade by 8% from a total of 7,883 offences in 1995 to 8,496 offences in 2004. Notable increases in Level 2 assault (7%) and assault of a police officer (21%) are largely responsible for this ten year increase. Level 1 assaults represent 80% of all non-sexual assaults and two out of three violent crimes. Over the past ten years, these types of offences have decreased almost 2% from 33,694 in 1995 to 33,096 in 2004. The large proportion of level 1 assaults drives the overall violent crime rate.

During the past decade, four out of five violent crimes were assaults.

Non-Sexual Assault Survey Results

Police Services Division conducted a survey of non-sexual assaults reported to police during 1995. The survey revealed the following characteristics of a "typical" level 1 assault in B.C.:

- The victim is equally likely to be male or female and is most likely between the ages of 18 and 35.
- Eight out of ten accused are male and are most likely between the ages of 18 and 35.
- In two-thirds of the incidents the victim and accused know each other.
- Three out of ten level 1 assaults are spousal assaults.
- In almost half the incidents the assault takes place in the victim's home, the accused's home, or a home shared by both.
- One in ten assaults occurs in a bar or restaurant.
- More than half of the accused charged with level 1 assault have a prior criminal record, and 40% of those records are for a previous violent or weapons offence.
- More than one-third of the incidents are cleared by charge by the police. Crown counsel proceeds with police-recommended charges 85% of the time.

- In more than 40% of the incidents where charges are laid, the accused is convicted of at least one criminal offence.
- In the remaining incidents proceeded with by Crown, the accused is not convicted. For those charges that end in a non-conviction, charges are most frequently be stayed (with or without a recognizance).

Spousal Assault

There is no Criminal Code offence known as spousal assault; rather, the determination that an offence is a spousal assault is based on the finding that an offender committed an offence (e.g., homicide, assault, criminal harassment) against his or her spouse. As such, the number of spousal assault incidents reported represents the number of Criminal Code incidents that contain supplementary information indicating that a crime against a spouse has occurred.

In 2004, the spousal assault rate remained stable at 2.2 spousal assaults per 1,000 population.

The number of spousal assault incidents does not necessarily count the number of different victims of a spousal assault. For example, if the same person is a victim of spousal assault at different times and has reported these crimes when they occurred, each incident would be recorded separately, and in effect the same victim would be counted more than once.

The reporting of spousal assault offences in British Columbia is supported by the provincial government's Violence Against Women in Relationships (VAWIR) policy. The VAWIR policy directs officials in the justice system (including police, Crown counsel, probation officers, victim assistance workers, and others) to emphasize the criminality of violence and to take the necessary measures to ensure the protection of women and children who may be at risk. The policy states that when attending an incident involving violence between spouses, and where there are grounds to believe an offence has occurred, police officers should always make an arrest when it is in the public interest. The policy shifts the responsibility to lay charges from the victim to the criminal justice system. The policy defines a spouse as a marital partner, a common-law partner or a partner in a dating or intimate relationship. Spousal assaults also include assaults between partners in same-sex relationships.

In 2002, British Columbia's spousal assault policy (VAWIR) was revised. These policy changes recognized the difficulties inherent in prosecuting spousal assault cases. Crown counsel now has enhanced prosecutorial discretion as well as a number of other measures designed to resolve low-risk spousal assault cases outside of the courtroom setting. In addition, the policy revisions provided for additional options relating to the protection and treatment of both victims and offenders.

Spousal Assault in 2004

In 2004, there were 9,417 incidents of spousal assault reported in British Columbia, a 3% increase from the 9,186 reported in 2003. The spousal assault rate in 2004 remained stable at 2.2 spousal assaults per 1,000 population.

Spousal assault offences fall into three categories: incidents where the offender is male, incidents where the offender is female and incidents where both spouses are involved. In 2004, 76% (7,124) of spousal assault incidents involved a male offender, 15% (1,393) involved a female offender and 9% (900) involved both spouses assaulting each other. These proportions have remained relatively constant since 1995.

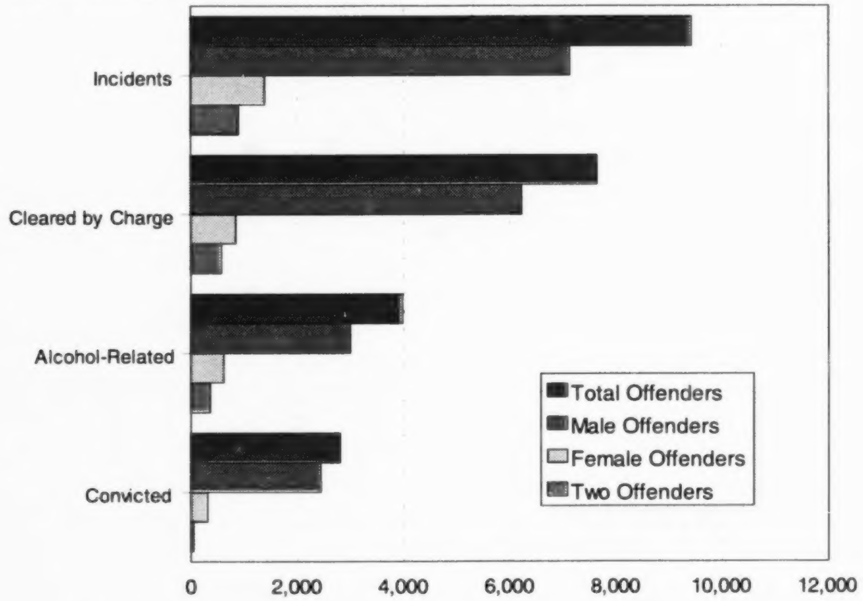
Spousal assaults are primarily a subset of non-sexual assault offences. In 2004, Criminal Code assault offences associated with spousal assault incidents accounted for 20% (9,176) of all assaults.

Although the majority of spousal assaults in 2004 involved the offence of non-sexual assault, there were 225 Criminal Code offences such as homicide, robbery, theft, and break and enter which also occurred in the context of a spousal assault.

Slightly less than 90% of the 10,452 Criminal Code offences reported within spousal assault incidents were cleared during 2004, 73% (7,640) were cleared by charge and 14% (1,466) were cleared by other means. Of the 7,505 persons charged, 79% (5,935) were charged in incidents where the offender was male, 11% (845) were charged in incidents where the offender was female, and 10% (725) were charged in incidents involving both spouses. Over 40% (3,973) of spousal assault incidents were alcohol related.

In 2004, over 40% of spousal assaults were alcohol related.

Figure 14: Spousal Assaults Reported to Police, 2004.

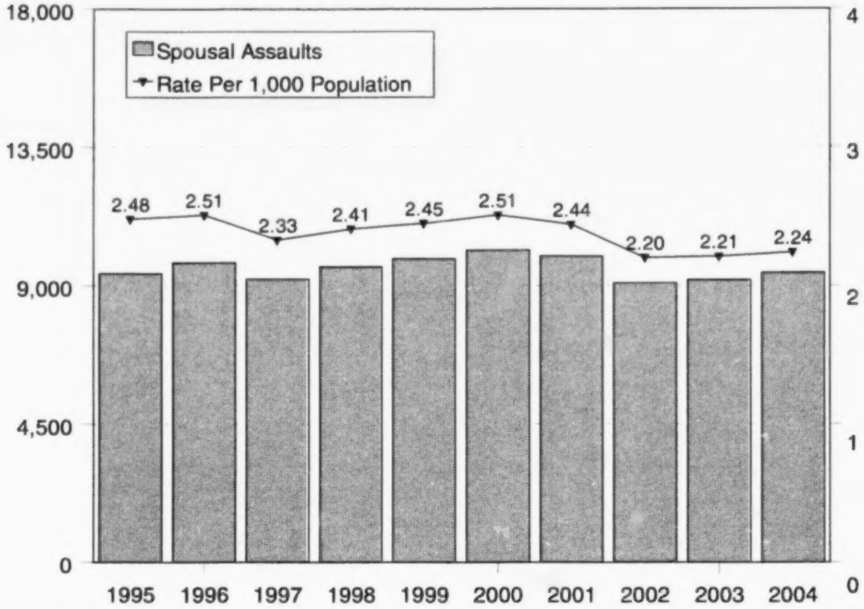


Spousal Assault Trends

From 1995 to 2004, the total number of reported spousal assault incidents fluctuated from a low of 9,077 reported in 2002 to a high of 10,156 in 2000. The spousal assault rate (number of spousal assaults per 1,000 population) remained relatively stable during the same period, averaging approximately 2.5 spousal assaults per 1,000 population. From 2002 to 2004, the spousal assault rate remained stable at 2.2.

The percentage of Criminal Code offences occurring within spousal assault incidents which are cleared (either by charge or by other means), has remained steady at approximately 90% during the last ten years. The percentage of these crimes cleared by charge has climbed each year during the past ten years, rising from 67% reported in 1995 to a high of 81% reported in 2002.

Figure 15: Number and Rate of Spousal Assaults, 1995 to 2004.



Trends in data indicate that the police are recommending charges in cases involving violence in relationships.

In 2004, the percentage of offences cleared by charge was considerably higher for spousal assault incidents (73% or 7,640 offences cleared by charge) compared to non-spousal assault incidents (37% or 15,305 offences cleared by charge). This trend has also been apparent during the past ten years. Overall, these data indicate that the police are recommending charges in cases involving violence in relationships.

There was also an overall increase in the number of persons charged in connection with spousal assault incidents during the past ten years. From 1995 to 2004, total persons charged rose from 6,603 to 7,505, an increase of 14%.

Spousal Assault Survey Results

Police Services Division conducted a survey of spousal assaults reported to police during 1995. The findings of this survey are available in full from Police Services Division's Survey of Spousal Assaults Reported to Police in 1995 in British Columbia. The survey revealed the following characteristics of a "typical" spousal assault in B.C.:

- The victim is female and is most likely between the ages of 25 and 35.
- The accused is male and similarly, is most likely between the ages of 25 and 35.

- The victim and accused are in a common-law relationship and the offence occurs in a home shared by the victim and accused.
- More than half of the incidents involve alcohol.
- More than two-thirds of the accused charged have a prior criminal record and half of those records are for a previous violent offence.
- Three-quarters of the incidents are cleared by charge by the police and Crown counsel approves nearly all of these incidents. More than half of the incidents proceed on a single charge and that charge is most likely a level 1 assault (assault that does not involve a weapon or serious bodily harm).
- In approximately half of the incidents proceeded with by Crown, the accused is convicted of at least one criminal offence.
- Of those charges that result in conviction, the offender is likely to receive a suspended sentence with probation, be incarcerated for a period of one to six months, or be put on probation (with or without a fine).
- In the remaining incidents proceeded with by Crown, the accused is not convicted. For those charges that end in a non-conviction, charges are most frequently stayed (with or without a recognizance).

In 2004, there were 4,518 robberies reported, an increase of 1% from 2003.

Robbery

Robbery offences are divided into three categories: robbery with a firearm, robbery with another weapon and other robbery. Other robbery includes assault with intent to steal (mugging) and stopping a mail conveyance with the intent to rob or search it.

Unlike other violent crimes in which an offence is counted for every victim, only one robbery offence is counted per incident regardless of the number of victims in that incident.

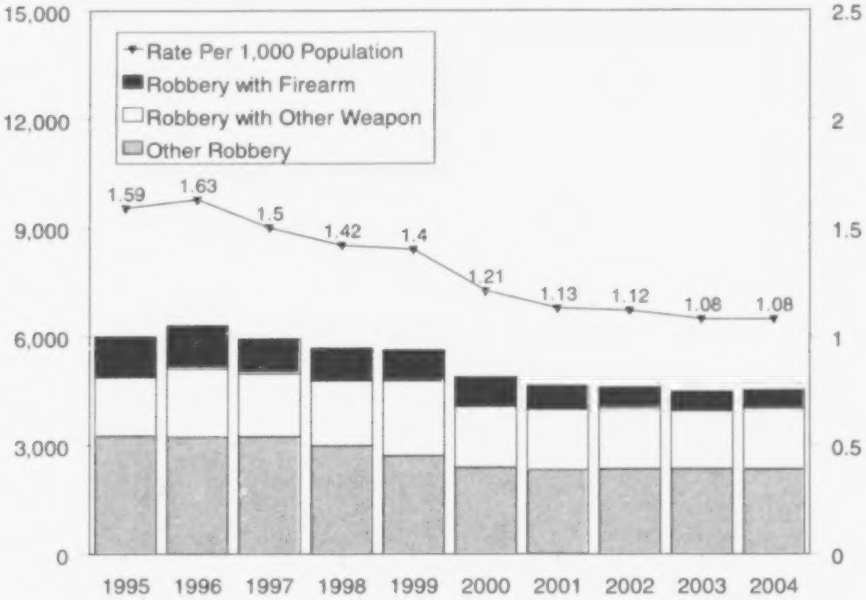
After remaining relatively constant throughout the 1980s, the number of robberies increased steadily in the early 1990s to a 20-year high of 6,304 offences in 1996. Between 1997 and 2003, the number of robberies reported consistently declined. In 2004, 4,518 robbery offences were reported, an increase of 1% from the 4,477 reported in 2003; the first rise in the number of robbery offences in nine years. The robbery rate, however, has remained at 1.08 offences per 1,000 population from 2003 to 2004.

In 2004, 52% (2,343) of robbery offences were classified as other robbery, compared with 37% (1,664) as robbery with a weapon other than a firearm, and 11% (511) as robbery with a firearm.

In 2004, 29% (1,307) of robberies were cleared (solved), 26% (1,188) were cleared by charge and a 3% (119) were cleared by other means.

Adults comprised 83% (1,136), and young offenders accounted for 17% (234), of the 1,370 persons charged with robbery in 2004. Adult and youth males represented 87% (1,191) of the total persons charged with robbery.

Figure 16: Number and Rate of Robbery Offences, 1995 to 2004.



In 2004, males represented 87% of persons charged with robbery.

Robbery Survey Results

In 1996, Police Services Division conducted a survey of robbery offences in British Columbia, the results of which were released in B.C. Crime Trends Newsletter, Issue #3 (March 2000). The survey revealed the following characteristics of a "typical" robbery in B.C.:

- One-third of robberies occurred on a street, road or highway. An additional 9% occurred in other outdoor areas including parks, school grounds and parking lots. Approximately 8% of the robberies occurred at convenience stores, 8% in homes, 7% at banks, and 6% at gas stations.
- Two-thirds of the surveyed victims were male and one-third were female.
- Approximately 27% of the victims were between the ages of 11 and 20 years while another 21% were between the ages of 21 and 30 years.
- A lone victim was involved in eight out of ten incidents.
- Physical force was used in 56% of the robberies while threats of violence were used in another 32% of incidents.
- In approximately half of the incidents a weapon was used during the robbery. Of these incidents, 41% of the weapons were knives and 27% were firearms.
- In eight out of ten surveyed robberies the accused was male. Youths (between the ages of 12 and 17 years) were identified as accused persons in 30% of the robberies while an additional 32% of the accused were between

the ages of 18 and 25 years. Half of the robberies involved a lone accused, while another 28% involved two accused persons.

- Of the surveyed incidents, approximately one-third were cleared by charge (solved) and the remaining two-thirds were not cleared (unsolved). An accused was not identified in almost all of the incidents that remained unsolved.

Abduction

There are four separate categories of abduction, each of which refers to the removal of a child from the parent or guardian's care. These offences are different from the offence of kidnapping, which refers specifically to the forcible removal or confinement of a person regardless of age or relationship. Abduction is characterized by behaviours such as unlawfully taking, enticing away, harbouring, or concealing a young person.

The current laws regarding abduction were enacted in 1983; they replaced sections of the Criminal Code that were only applicable to the abduction of females under a specific age.

The four categories of abduction are as follows: abduction of an unmarried person under the age of 16 against the will of a parent or guardian; abduction of a person under the age of 14 with the intent of depriving the parent or guardian of possession of the child; abduction by a parent or guardian of anyone under the age of 14 in contravention of a custody order, with the intent to deprive the person with legal custody of having custody of the child; and abduction of a person less than 14 years of age by a parent or guardian where there is no custody order, with the intent to deprive the other parent of the child.

In 2004, there were 129 abductions, the highest number recorded in the past decade.

In 2004, there were 129 abduction offences, 45% more than the 89 abductions reported in 2003. Of these 129 abductions, 45% (58) were abductions of children under the age of 14, 33% (42) were abductions in contravention of a custody order, 12% (15) were abduction of a child under 14 (without a custody order), and the remaining 11% (14) were abductions of persons under the age of 16. The 129 abduction offences in 2004 is the highest number of abduction offences reported in the past ten years.

In 2004, 29% (38) of abductions were cleared (solved), 23% (30) were cleared by charge while 6% (8) were cleared by other means. Of the 29 offenders charged with abduction in 2004, 38% (11) were male, and 62% (18) were female.

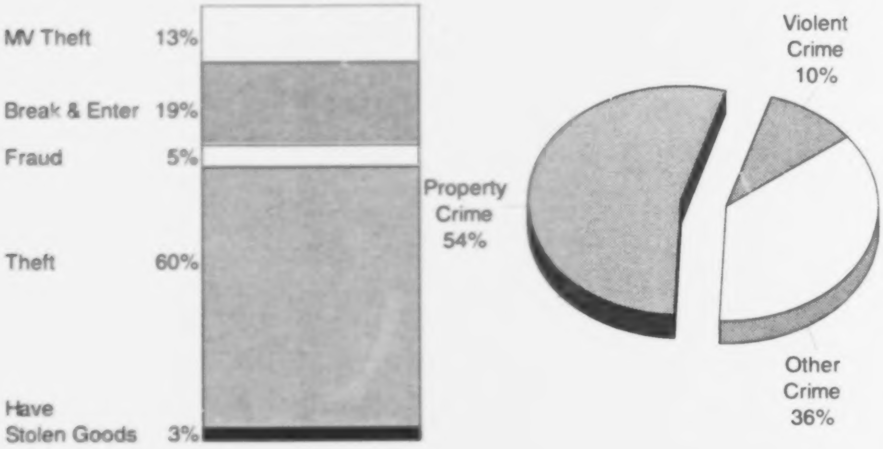
Other Crimes Against Persons

There are other Criminal Code offences that are not included in the violent crime category, but may constitute a crime against another person (as opposed to property). The most evident of these offences is criminal harassment. Within the federally prescribed method of coding criminal offences for the UCR Survey, criminal harassment crimes are included in the "other" crime category. Consequently, criminal harassment is discussed in more detail in Chapter 4.

CHAPTER 3

Property Crime in British Columbia

Figure 17: Property Crime by Category, 2004.



Property crimes represented 54% (283,790) of all Criminal Code offences reported in British Columbia during 2004. These crimes include break and enter, motor vehicle theft, other theft (such as shoplifting, theft of bicycles, theft from motor vehicles) as well as fraud and possession of stolen property. Because three out of five reported crimes are property offences, these offences have a greater impact on B.C.'s crime trends than other types of crime.

Property Crime in 2004

In 2004, police reported 283,790 property crimes, a decrease of 2% when compared with the 289,113 offences reported in 2003. The 2004 property crime rate was 67.6 property crimes per 1,000 population, 3% lower than in 2003.

Most property crimes are either thefts or break and enter offences. In 2004, there were 170,977 reported thefts and 52,778 break and enter offences. These two offence categories together represented almost 80% of all property crimes and 43% of total Criminal Code offences in 2004.

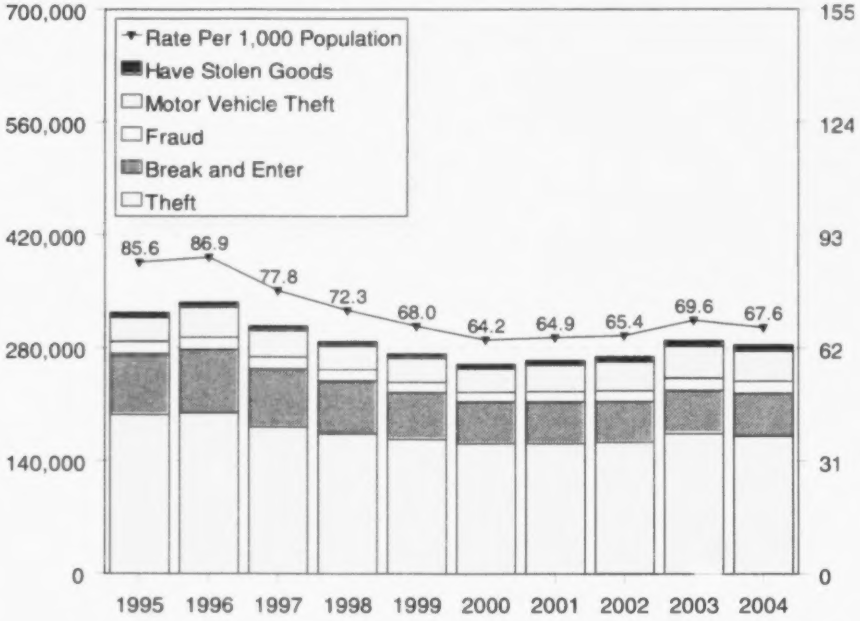
In 2004, 23,882 persons were charged with property crimes. Approximately 88% (20,942) of total persons charged were adults and 12% (2,940) were youths between 12 and 17 years of age. Males represented 77% (18,506) of total persons charged and females represented 23% (5,376). These percentages have remained about the same over the last ten years.

Property Crime Trends

After remaining fairly stable during the 1980s, the number of property crimes in B.C. began increasing in 1990 and peaked at 336,746 offences reported in 1996. Starting in 1997, the number of property crimes decreased over the next four years, falling by an average of 6% each year. Increases have been reported in the number of property crimes in the past few years (rising 11% between 2000 and 2003). In 2004, the number of property crimes has stabilized at 283,790 offences, a decrease of 2% from the 289,113 offences in 2003. The number of property crimes reported in 2004 is 16% lower than 20 year high reported in 1996.

The number of offences cleared (solved) is low for most property crimes. In 2004 only 13% of property crimes were cleared.

Figure 18: Number and Rate of Property Offences, 1995 to 2004.



The property crime rate remained relatively constant throughout the 1980s, averaging about 80 offences per 1,000 population. It rose through the 1990s, peaked in 1996, and declined each subsequent year. Similar to the number of offences, the property crime rate increased between 2000 and 2003 (8%) and has stabilized in 2004 at 67.6 offences. The property crime rate in 2004 is 22% lower than the 86.9 offences per 1,000 population reported in 1996.

The number of offences cleared (solved) is low for most property crimes. From 1995 through 1999 the percentage of property crimes cleared remained stable at 17%. Since then this percentage declined to 15% (39,518) in 2000 and has continued to decrease for the past 5 years. In 2004, only 13% (36,994) of property crimes were solved.

Break and Enter

Break and enter offences are divided into three categories: residential, business, and other break and enters. Other break and enter offences include break and enter of trains, boxcars, unattached trailers or storage lockers.

Break and Enter in 2004

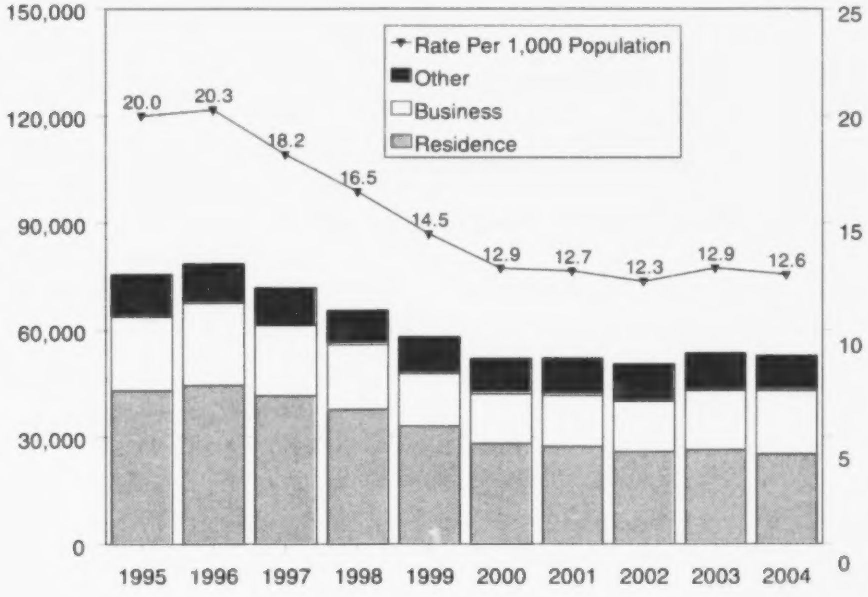
In 2004, police reported 52,778 break and enter offences, a decrease of 741 offences or 1% from the 53,519 reported in 2003. The 2004 break and enter rate was 12.6 offences per 1,000 population, 2% lower than in 2003.

During 2004, 48% (25,204) of break and enter offences occurred in homes, 34% (17,758) in businesses, and 18% (9,816) in other premises. Break and enter offences accounted for 19% of all property crime and 10% of all Criminal Code offences in 2004.

In 2004, 69% (2,457) of the 3,550 persons charged with breaking and entering were male adults, 8% (277) were female adults, 20% (702) were male youths, and the remaining 3% (114) were female youths.

In 2004, break and enter crimes decreased by 1% while the break and enter rate decreased by 2%.

Figure 19: Number and Rate of Break and Enter Offences, 1995 to 2004.



Break and Enter Trends

In 1996 the number of break and enter offences reached a 20-year high of 78,604 offences. Between 1996 and 2000, the number of reported break and enter offences declined by almost 27,000 offences or 34%, and stabilized at an average of 51,000 reported offences each year between 2000 and 2002. In 2004, the number of break and enter offences fell slightly (1%) to 52,778 offences following a 6% increase in 2003, the first substantial increase in a decade.

The rate of break and enter offences was stable at 20 offences per 1,000 population between 1990 and 1996. From 1997 to 2000, the rate decreased an average of 10% per year and has remained relatively stable over the past five years at an average of 12.7 offences per 1,000 population. In 2004, the break and enter rate was 12.6, a slight decrease of 2% from the 2003 rate of 12.9.

The clearance (solved) rate for break and enter offences has averaged approximately 9% over the past ten years. The clearance rate for break and enter offences during 2004 was 8% (4,106).

Motor Vehicle Theft

Motor vehicle theft data include theft or attempted theft of automobiles, trucks, motorcycles and other vehicles (such as snowmobiles, farming and industrial implements, and all terrain vehicles). Most stolen vehicles are cars or trucks.

In 1998, police officers from the RCMP and Lower Mainland municipal police departments began work on the Auto Theft Task Force (ATTF), renamed the Integrated Municipal Provincial Auto Crime Team (IMPACT) in 2003. IMPACT's priorities include targeting offenders who are stealing vehicles for thrill seeking purposes; crimes in which vehicles are stolen and disposed of offshore or in other parts of Canada, or taken to "chop shops" for dismantling; and crimes in which vehicles are stolen and then used in the commission of further criminal offences.

The RCMP and Lower Mainland municipal police departments have a joint task force to combat auto crime.

Motor Vehicle Theft in 2004

There were 37,341 motor vehicle thefts reported in 2004 representing a decline of 2,150 offences or 5% from 2003. Of the 37,341 motor vehicle thefts reported in 2004, 58% (21,757) were cars, 35% (13,054) were trucks and the remaining 7% (2,530) were motorcycles or other vehicles. In 2004, the motor vehicle theft rate was 8.9 offences per 1,000 population, a 6% decrease from the 2003 motor vehicle theft rate of 9.5.

Approximately 5% (1,773) of motor vehicle thefts were cleared (solved) in 2004. Of the 1,677 persons charged with motor vehicle theft in 2004, 65% (1,084) were male adults, 10% (168) were female adults, 22% (366) were male youths, and the remaining 4% (59) were female youths.

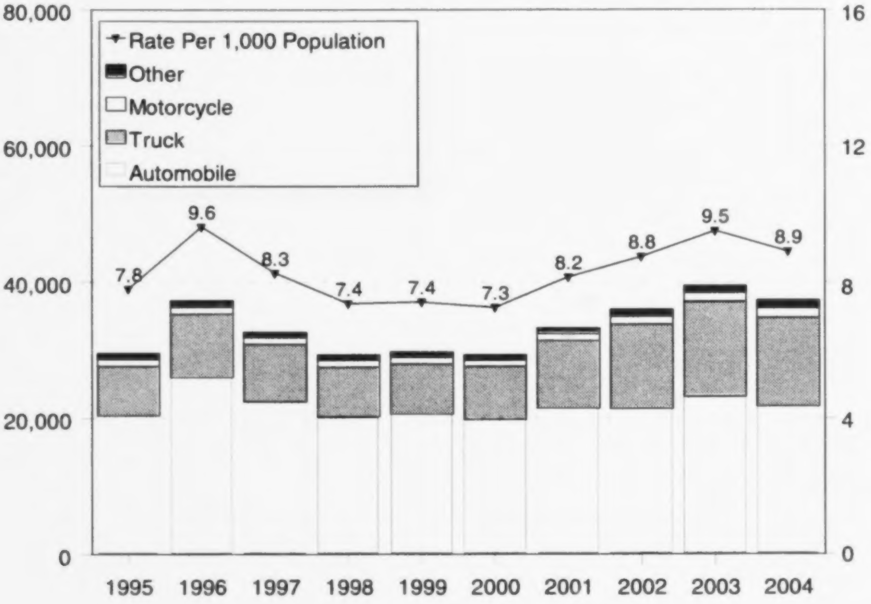
Adults accounted for 75% (1,252) of persons charged with this type of offence while youths represented 25% (425). However, since more than 95% of motor vehicle thefts in 2004 remained unsolved, generalizing about the characteristics of offenders is difficult.

Motor Vehicle Theft Trends

Similar to other types of property crime, the number of motor vehicle thefts remained fairly constant during the 1980s until 1990. Aside from the substantial increase in 1996, motor vehicle thefts averaged at approximately 30,000 offences between 1995 and 2000. The number of reported motor vehicle thefts then steadily increased, reaching a ten year high of 39,491 offences in 2003. In 2004, the number of motor vehicle thefts declined to 37,341 offences.

The rate of motor vehicle thefts per 1,000 population remained relatively constant in 1994 and 1995, and from 1998 to 2000. Peaks in the motor vehicle theft rate occurred in 1996 (9.6 offences) and 2003 (9.5 offences). In 2004, the motor vehicle theft rate decreased 6% to 8.9 offences per 1,000 population

Figure 20: Number and Rate of Motor Vehicle Thefts, 1995 to 2004.



In 2004, the number of motor vehicle thefts declined by 5% and the motor vehicle theft rate decreased by 6%.

The clearance (solved) rate for motor vehicle theft decreased over the past ten years from 9% in 1995 to 5% in 2004. Although the clearance rate is low, about 95% of stolen vehicles are recovered. Many of these vehicles are damaged by the offender breaking into the vehicle, driving carelessly, or removing parts for resale.

Theft

Theft, including attempted theft, is divided into two major categories: theft from motor vehicle and other theft. Other theft includes offences such as theft of electricity or gas, theft of data or computer software, as well as the illegal use of pay-TV descramblers and computer-aided long-distance calls. As of 2004, other theft also includes shoplifting and bicycle theft. Theft accounts for three out of five property crimes and one out of three Criminal Code offences.

Every theft is classified according to the value of the goods stolen and for reporting purposes, are divided into over and under $5,000 categories.. From 1986 to 1994, thefts were divided into over and under $1,000 categories. In 1995 these categories were revised to theft over and under $5,000. Since 1995, the theft under $5,000 category has represented approximately 98% of total theft offences. This section describes the data concerning theft but does not distinguish between the over and under theft categories.

Theft in 2004

In 2004, there were 170,977 thefts reported to the police. This represents a 2% decrease from the 174,090 thefts reported in 2003. As in previous years, thefts from motor vehicles (84,608) accounted for slightly less than half of all thefts.

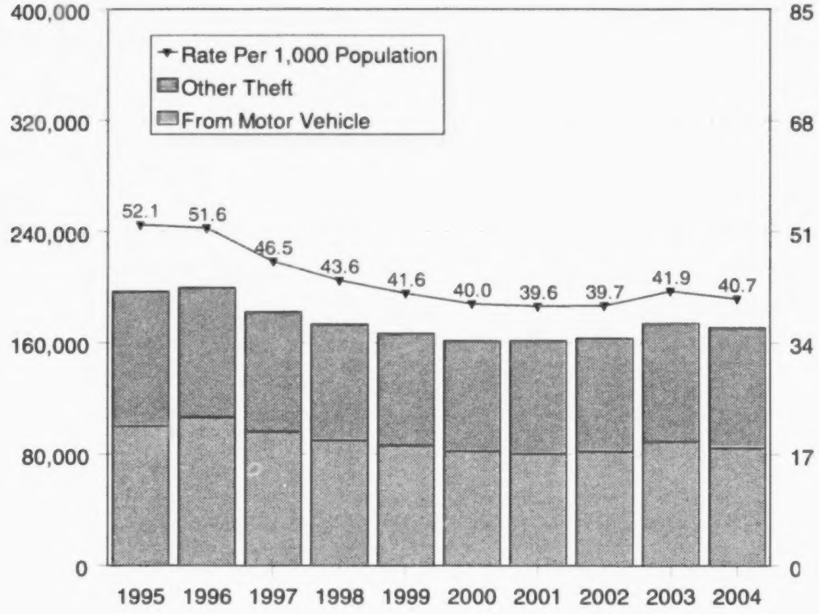
In 2004, the theft rate per 1,000 population was 40.7, a 3% decrease from the 2003 rate of 41.9.

Approximately 13% (22,009) of thefts were cleared (solved) in 2004, 7% (12,244) were cleared by charge and 6% (9,765) were cleared by other means.

Of the 13,045 persons charged with theft in 2004, 67% (8,733) were male adults, 23% (3,053) were female adults, 6% (811) were male youths and 3% (448) were female youths.

Theft accounts for 60% of property crime, and 33% of all Criminal Code offences.

Figure 21: Number and Rate of Thefts, 1995 to 2004.

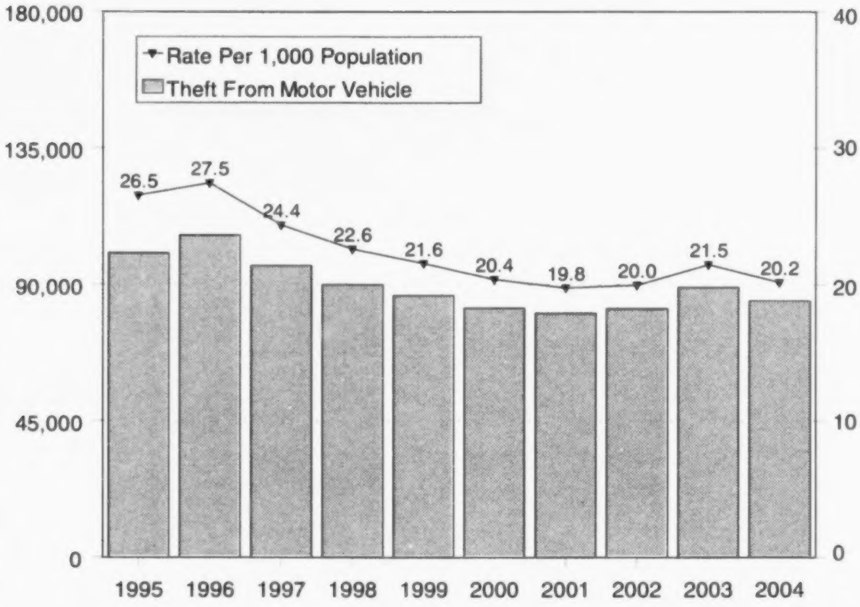


Theft Trends

Like other property crimes, the number of thefts remained stable through the 1980s then rose steeply in the early 1990s, peaking at almost 200,000 reported offences in 1996. From 1996 to 2000, however, the number of thefts declined an average of 5% per year and remained relatively stable from 2000 to 2002 averaging approximately 162,000 offences per year. Similar to other offences categories, the number of thefts increased in 2003 by 7% to 174,090 reported offences. In spite of the 2003 increase, the overall ten year trend in thefts is decreasing. In 2004, thefts decreased by 2% (170,977 offences) from those reported in 2003 and are 14% lower than the reported peak reached in 1996.

Thefts from motor vehicles generally represent 50% of theft offences. In 1996, there were 106,366 reported thefts from motor vehicles; a large contributor to the ten year peak in reported thefts. Over the past decade thefts from a motor vehicle have, in general, decreased. In 2004, there were 84,608 reported thefts from a motor vehicle, 20% lower than the number reported in 1996.

Figure 22: Number and Rate of Thefts From Motor Vehicles, 1995 to 2004.



Thefts from motor vehicle historically represent almost 50% of all reported thefts.

As noted above, theft of bicycles and shoplifting were subsumed within the other theft category in 2004. Unlike thefts from motor vehicles, other thefts did not peak in 1996. Other thefts decreased yearly from 1995 to 2000 (from 96,616 offences to 79,105 offences respectively), and in the last five years have increased each year reaching 86,369 reported other theft offences in 2004. Despite this increase, the number of other thefts in 2004 is still 11% below that in 1995.

The theft clearance (solved) rate remained stable at 16% from 1995 to 1999 but has declined 13% over the past five years.

The number of persons charged with theft has decreased steadily over the past number of years. There were 22,436 people charged with theft in 1996, 16,141 were charged in 2000 while only 13,045 persons were charged with theft in 2004.

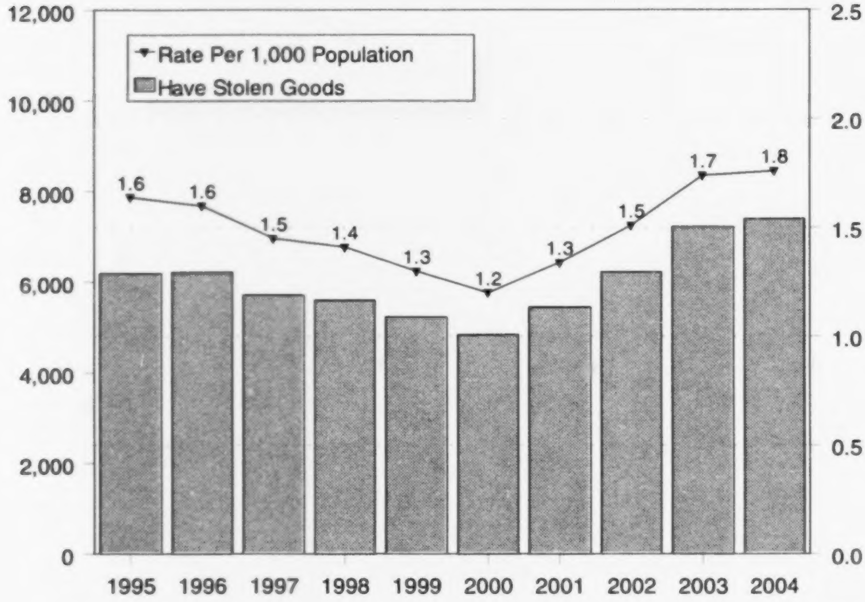
Have Stolen Goods

A total of 7,932 "have stolen goods" (also known as possession of stolen property) offences were reported in 2004, an increase of 172 offences or 2% from the 7,220 offences reported in 2003. From 1995 to 2000, possession of stolen property offences steadily declined by 23% overall. From 2000 to 2003, however, the number of offences increased an average of 14% per year and has increased slightly for 2004.

In 2004, the rate of possession of stolen property offences per 1,000 population was 1.8, an increase of 6% from the 2003 rate of 1.7. For the past 10 years, the possession of stolen property rate never exceeded 2 offences per 1,000 population, averaging slightly less than 1.5 offences per 1,000 population.

Over the past decade, an average of 78% of have stolen goods offences were cleared by police.

Figure 23: Number and Rate of Have Stolen Goods, 1995 to 2004.



Due to the nature of these offences, clearance rates are high. In 2004, 74% (5,462) of possession of stolen property incidents were cleared, 52% (3,857) were cleared by charge and 22% (1,605) were cleared by other means. Over the last ten years, an average of 78% of possession of stolen property offences were cleared.

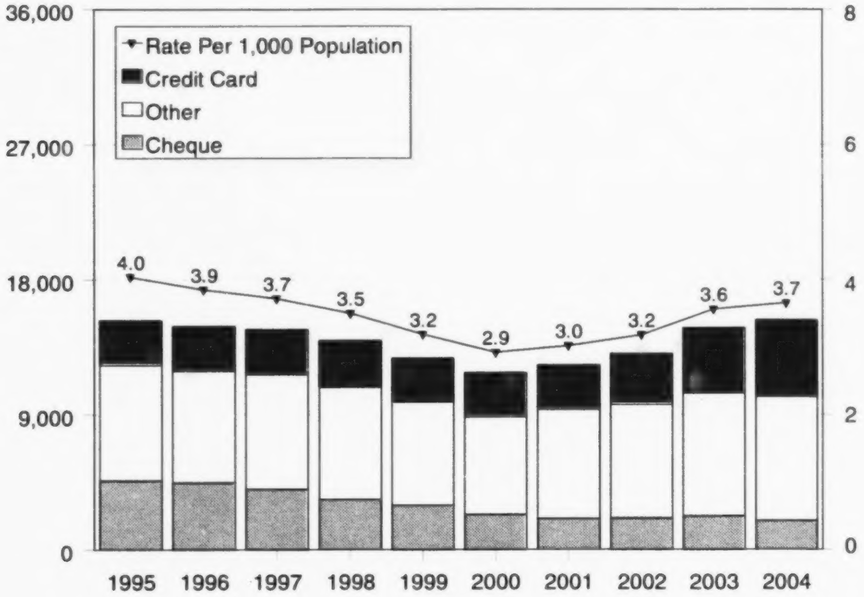
Of the 3,700 persons charged with possession of stolen property in 2004, 81% (3,011) were males and almost 90% (3,323) were adults.

Fraud

Fraud offences are reported under three categories: cheque, credit card and other fraud. Other fraud includes offences such as criminal breach of trust, real estate fraud, and forgery.

There were 15,302 fraud offences reported in 2004, an increase of 3% from the 14,793 offences reported in 2003, and a 30% increase from the 11,794 reported in 2000.

Figure 24: Number and Rate of Fraud Offences, 1995 to 2004.



There were 15,302 frauds reported in 2004, a 30% increase from 2000.

In 2004, the rate of fraud offences per 1,000 population was 3.7, an increase of 3% from the 2003 rate of 3.6. For the past ten years, the fraud rate averaged less than 4 offences per 1,000 population.

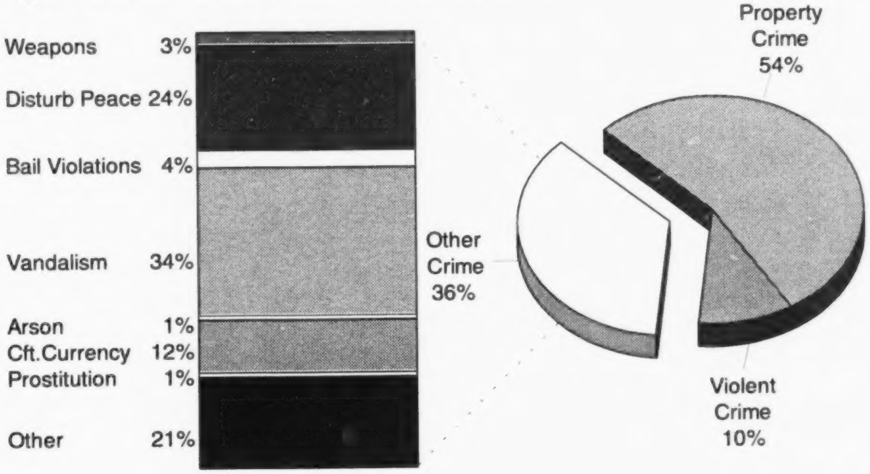
Clearance rates were relatively high for this type of offence, averaging 53% between 1995 and 2000. However, clearance rates for fraud decreased over the past five years. In 2004, 24% (3,644) of fraud offences were cleared (solved), 15% (2,216) were cleared by charge while 9% (1,383) were cleared by other means.

Of the 1,910 persons charged with fraud in 2004, 68% (1,303) were male adults, 28% (544) were female adults, 2% (39) were male youths and 1% (24) were female youths.

CHAPTER 4

Other Crime in British Columbia

Figure 25: Other Crime by Category, 2004.



Approximately 36% (191,517) of all Criminal Code offences fall within the category of other crime. These other crimes include mischief and property damage (vandalism), disturbing the peace, counterfeit currency, bail violations, possession of offensive weapons, arson, prostitution, criminal harassment, and miscellaneous other Criminal Code offences (a catch-all category of offences for which specific data collection codes do not exist).

In 2004, there were 191,517 other crimes, a 7% increase from the 179,145 other offences reported in 2003.

From 1993 to 1999, the number of reported other crimes steadily declined by an average of 3% per year. Between 1999 and 2004, however, the number of reported other crimes increased by 34% from 142,957 in 1999 to 191,517 in 2004.

Of the total other crimes reported in 2004, 34% (62,222) were vandalism offences. Another 24% (44,916) were disturb the peace offences. Together these offences represent almost 60% of all other crimes.

In 2004, the other crime rate per 1,000 population was 45.6, an increase of 6% from the 2003 other crime rate of 43.1. After decreasing an average of 2% per year between 1995 and 1999, the other crime rate increased approximately 28% between 1999 to 2004. The increase in the volume of other crimes is largely driven by substantial rises in the number of counterfeit currency and disturb the peace offences.

The clearance (solved) rate for other offences was 26% (50,083) in 2004. This represents a 13% decrease from the 2003 clearance rate of 30%. Clearance rates for other crimes are largely influenced by the volume of mischief and property damage offences which traditionally have low clearance rates.

Of the 17,455 persons charged with other crimes during 2004, 89% (15,500) were adults and 11% (1,955) were youths between 12 and 17 years. Males represented 87% (15,129) of total persons charged.

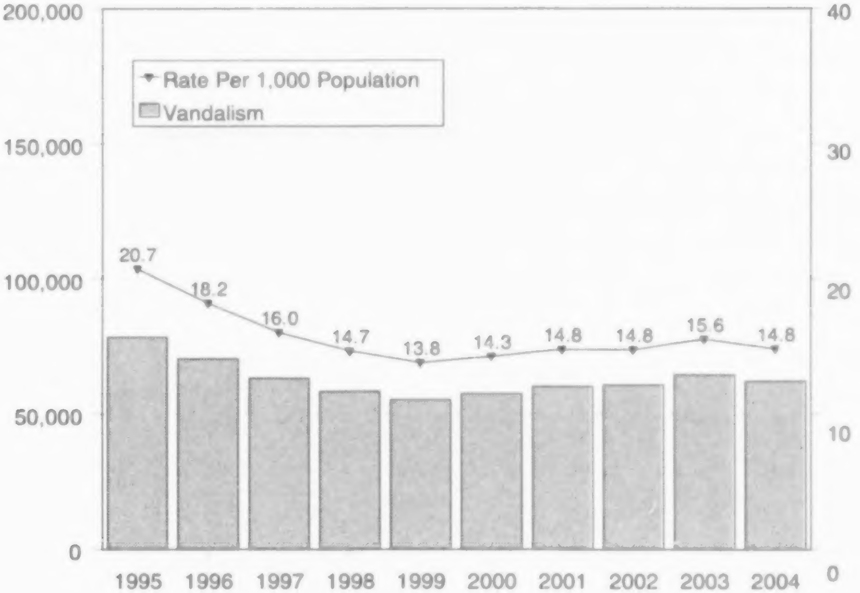
In 2004, there were 191,517 other crimes, a 7% increase from the 179,145 other offences reported in 2003.

Mischief and Property Damage (Vandalism)

The offence of mischief and property damage is often called vandalism. It includes incidents where property is destroyed or damaged, acts where property is rendered dangerous or inoperative, or acts that render access to property denied or obstructed. Similar to thefts, mischief and property damage offences are classified according to their value and are divided into over and under $5,000 categories. Since 1995, most offences in this category have been reported as mischief and property damage under $5,000.

This section describes the data concerning mischief and property damage but does not distinguish between the over and under categories.

Figure 26: Number and Rate of Vandalism Offences, 1995 to 2004.



In 2004, a total of 62,222 mischief and property damage offences were reported. This is a 4% decrease from the 64,551 offences reported in 2003.

In 1995 there were 78,478 mischief and property damage crimes reported, a ten year high. Between 1995 and 1999, the total number of reported mischief and property damage offences steadily declined by an average of 8% per year.

From 2000 to 2003, however, the number of mischief and property damage offences reported has increased each year, though still below the 1995 volume of offences.

Over the past decade, the mischief and property damage rate per 1,000 population has ranged from a high of 20.7 offences per 1,000 population in 1995 to a low of 13.8 in 1999. In 2004, the mischief and property damage rate was 14.8, a 5% decrease from the 2003 rate of 15.6 offences per 1,000 population.

Clearance rates are low for this type of offence, fluctuating between 14% and 9% over the past decade. Approximately 10% (6,264) of mischief and property damage offences were cleared (solved) in 2004, 3% (1,854) were cleared by charge and 8% (4,410) were cleared by other means.

Of the 1,991 persons charged with mischief and property damage crimes in 2004, 74% (1,482) were adults and 26% (509) were youths. Males represented almost 88% (1,757) of total persons charged.

In 2004, mischief and property damage offences represented 12% of total Criminal Code offences, a decrease from 1994, when these offences accounted for almost one-fifth of total crime.

Changes in reported prostitution offences are highly sensitive to changes in police enforcement practices.

Prostitution

Prostitution offences are classified into three categories: keeping a bawdy house, procuring, and other prostitution offences. The offence of keeping a bawdy house occurs when premises are used for prostitution. Procuring, commonly called pimping, is the offence of enlisting or attracting, by any means, a person to engage in prostitution. Other prostitution offences include incidents in which a person stops or communicates with another person in a public place for the purposes of prostitution.

In 2004, there were 2,082 reported prostitution offences, an increase of 10% from the 1,899 prostitution offences reported in 2003. Approximately 92% (1,907) of these crimes were for other prostitution offences, 7% (150) were for procuring and the remaining 1% (25) for keeping a bawdy house.

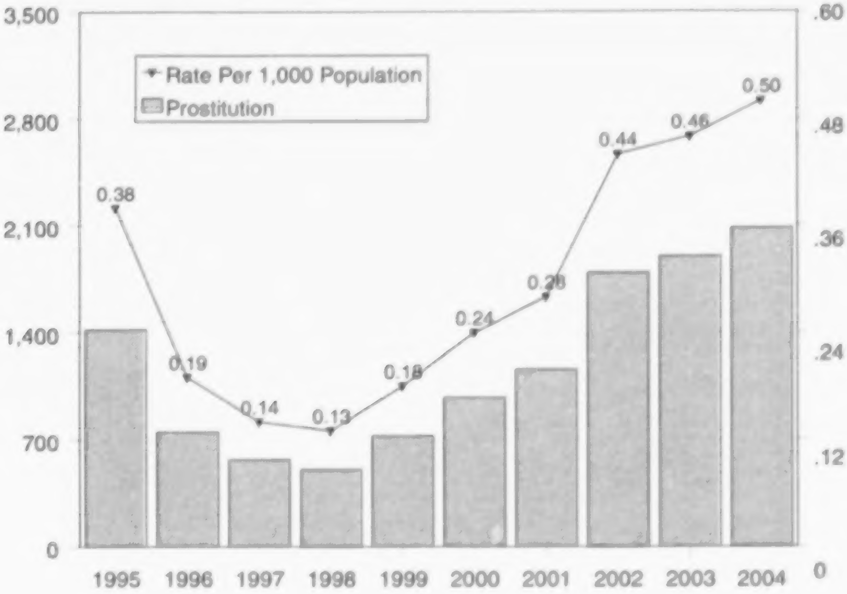
Four out of five prostitution offences were reported in core urban areas, including Vancouver, Nanaimo, Surrey, Prince George and Kelowna.

In 2004, as in previous years, the prostitution rate was less than 1 offence per 1,000 population. From 1995 to 2004, the prostitution rate has fluctuated, ranging from a high of 0.50 in 2004 to a low of 0.13 in 1998.

Traditionally, clearance rates for prostitution offences have been high; however, over the past decade clearance rates have declined. From 1995 to 1999, an average of 86% of prostitution offences were cleared (solved). Since 1999, prostitution offence clearance rates have steadily decreased. In 2004, 49% of prostitution offences were cleared.

In 2004, 351 persons were charged with prostitution offences, 2% less than in 2003. Male adults accounted for 56% (196) of persons charged, while female adults accounted for 42% (148). Youths represented the remaining 2% (7).

Figure 27: Number of Prostitution Offences, 1995 to 2004.



In 2004, there were 5,034 weapons offences reported, an increase of 2% from 2003.

With the introduction of Bill C-49 (covering public communication for the purposes of prostitution) in 1986, the number of prostitution offences increased substantially over previous years. The number of offences peaked in 1991 and 1992, when 1,700 offences were reported in each of these years, and then declined to a low of 503 offences reported in 1994. In 1995, the number of prostitution offences more than doubled compared with 1994, but then decreased by 47% in 1996, and decreased by an additional 33% between 1996 and 1998. Between 1999 and 2004, however, the number of prostitution offences has steadily increased each year. It is important to stress that changes in prostitution offences are highly sensitive to changes in police enforcement practices.

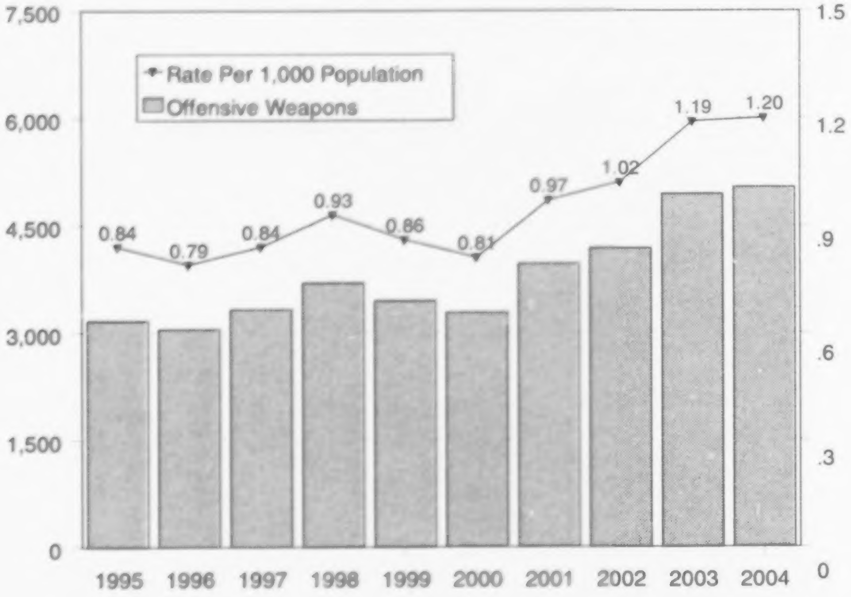
Offensive Weapons

In 1998, the federal Firearms Act was proclaimed. The Act mandated the licensing of all gun owners by January 1, 2001 and the registration of all guns by January 1, 2003. The firearms registration requirements of the legislation were intended to provide a process through which illegal firearms could be identified and tracked. In addition, the Act set out licensing requirements for all firearms, including enhanced screening procedures, spousal notification, and safety training.

As a reflection of legislative changes, the offence categories for weapons have been modified. The new categories covered firearms usage, weapons possession, trafficking import/export and other weapons offences. Until 1999, offensive weapons crimes were divided into four offence categories: explosives, prohibited weapons, restricted weapons and other weapon offences. The revised categories are not comparable with the previous offence categories.

In 2004, there were 5,034 weapons offences reported, an increase of 2% from the 4,939 reported in 2003. Of these offences, 63% (3,160) were for weapons possession and 28% (1,398) were for "other" weapons offences. The remaining 9% (476) were related to firearms usage and weapons trafficking. Although the number of weapons offences increased an average of 8% per year from 1999 onward, the weapons rate remained relatively stable at 1 offence per 1,000 population. In 2004, the rate was 1.2 offences per 1000 population.

Figure 28: Number of Weapons Offences, 1995 to 2004.



Clearance rates for weapons offences are relatively high. In 2004, 58% of these types of offences were cleared by police.

Clearance rates are relatively high for this type of offence. In 2004, 58% (2,895) weapons offences were cleared; 27% (1,337) by charge and 31% (1,558) by other means.

Of the 1,409 persons charged with weapons offences in 2004, 81% (1,136) were adult males, 7% (92) were adult females, 12% (169) were male youths, and 1% (12) were female youths.

Arson

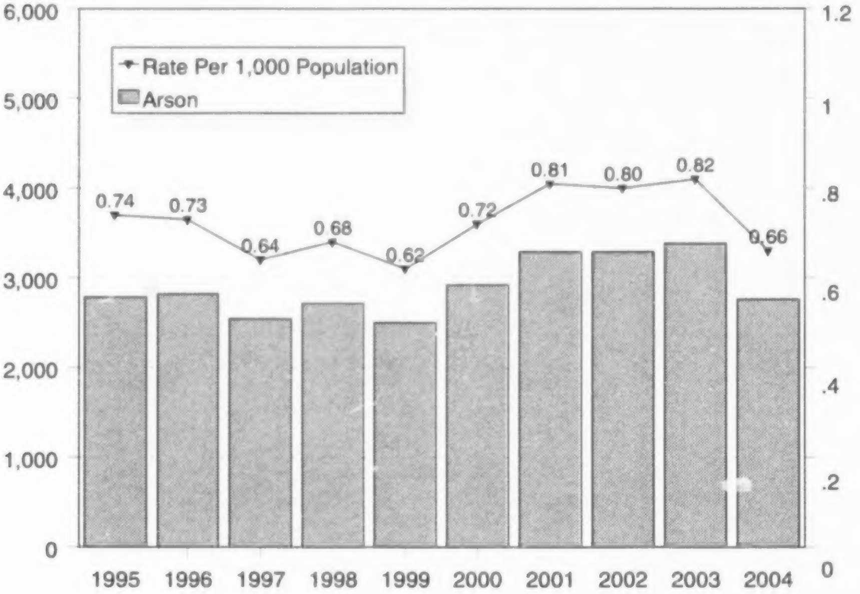
Before 1990, arson was more narrowly defined than it is today. With the proclamation of Bill C-53 in July 1990, the definition of arson was expanded and the penalties became more serious. Besides causing damage to specific types of property, arson now includes wilful disregard for the lives and safety of others and negligent conduct that results in fires or explosions. It also criminalizes the possession of flammable or incendiary materials.

Mischief arson, such as setting fire to abandoned cars or waste receptacles, was previously reported as mischief and property damage. Under the new legislation, these offences are now reported as arson. This resulted in a significant increase in the number of arson offences recorded since 1990.

Between 1995 and 2000, the number of arson offences reported remained relatively stable, averaging approximately 2,900 offences per year. The number of arson offences increased to 3,293 offences in 2001 and reached a ten year high of 3,386 offences in 2003. In 2004, there were 2,761 arson offences, an 18% decrease from 2003.

In 2004, 2,761 arson offences were reported, an 18% decrease from 2003.

Figure 29: Number and Rate of Arson Offences, 1995 to 2004.



Before 1991, approximately 20% of arson offences were cleared. Since that time, the average clearance rate has dropped to approximately 10% over the past five years. In 2004, 9% (237) of arson offences were cleared. This decrease in clearance rates is largely due to the wider definition of arson.

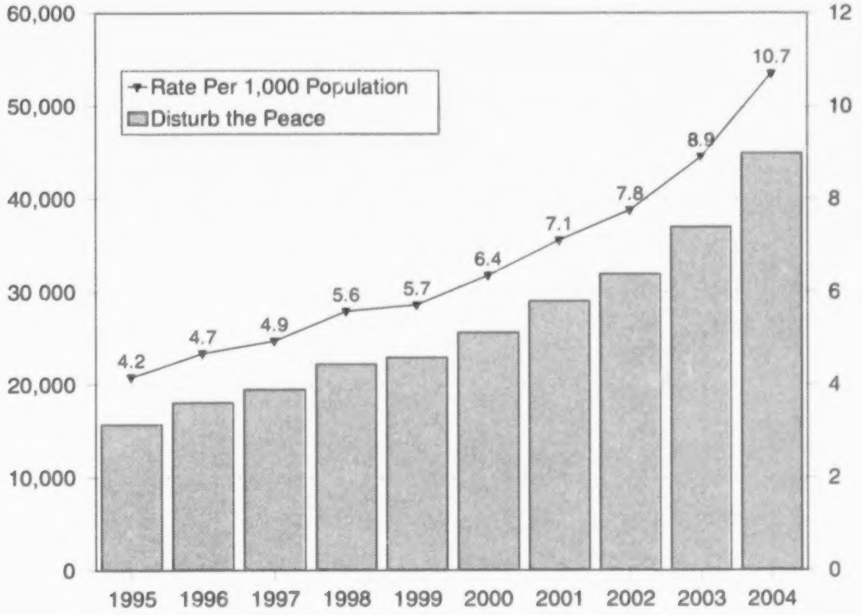
Of the 123 persons charged with arson offences in 2004, 50% (61) were adult males, 12% (15) were adult female, 35% (43) were male youths and the remaining 3% (4) were female youths.

Disturbing the Peace

Disturbing the peace is defined as causing a disturbance in or near a public place. A "disturbance" includes behaviour such as fighting, making loud noise, using obscene language, and being drunk and disorderly.

Rather than proceeding under the Criminal Code, police often deal with incidents of disturbing the peace as offences under provincial statutes or municipal bylaws. This allows police to address these crimes through the municipal and provincial ticketing process.

Figure 30: Number and Rate of Disturb the Peace Offences, 1995 to 2004.



Police often deal with incidents of disturbing the peace through the municipal and provincial ticketing process.

The number of disturbing the peace offences has fluctuated during the past twenty years. Between 1984 and 1995, the number of reported offences remained stable, averaging approximately 15,000 offences per year. Over the past decade, the number of disturbing the peace offences has steadily increased each year. In 2004, there were 44,916 Criminal Code disturbing the peace offences reported, representing an increase of 21% from the 37,009 reported in 2003.

Likewise, the rate per 1,000 population for disturbing the peace offences remained relatively constant prior to 1997, never exceeding 5 offences per 1,000 population. During the last seven years, however, the rate rose from 5.6 in 1998 to a ten year high of 10.7 recorded in 2004.

In 2004, 33% (14,649) of disturbing the peace offences were cleared. Of the 704 persons charged with disturbing the peace offences in 2004, 84% (593) were adults and 16% (111) were youths. Males represented 87% (611) of persons charged with disturbing the peace offences.

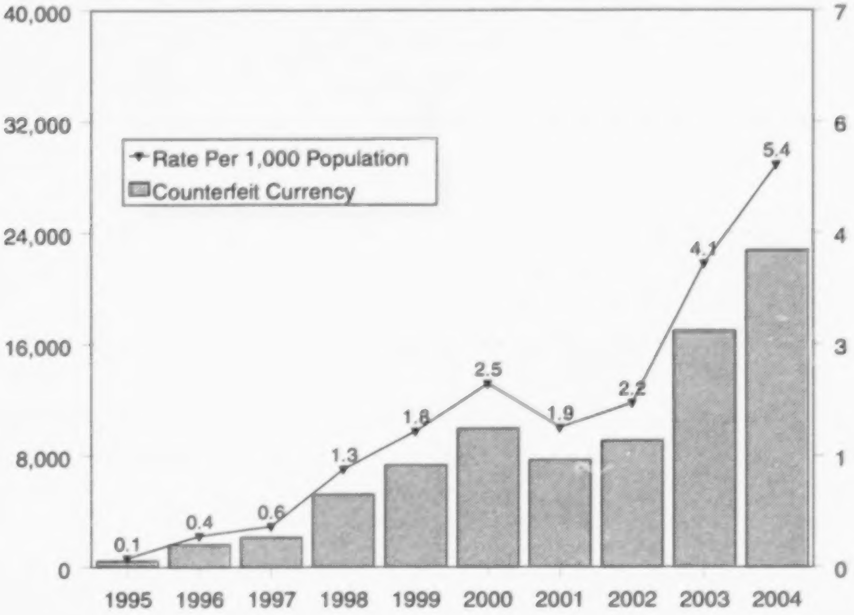
Counterfeit Currency

The number of reported counterfeit currency offences has increased substantially over the past decade, rising from a low of 447 offences reported in 1995 to 22,758 offences in 2004. While an increase in counterfeiting activity has occurred in the province, the rise in these offences can also be partially attributed to an expansion of detection training and bank note security, as well as enhancements in police enforcement practices.

A total of 22,758 counterfeit currency offences were reported in 2004, an increase of 5,785 offences or 34% from the 16,973 offences reported in 2003, and a 128% increase from the 9,972 offences reported in 2000. Counterfeit currency crimes accounted for 12% of all other crimes and 4% of all Criminal Code offences in 2004.

Expanded detection training and bank note security are partially responsible for the rise in counterfeit currency crimes.

Figure 31: Number and Rate of Counterfeit Currency Offences, 1995 to 2004.



In 2004, the rate of counterfeit currency offences per 1,000 population was 5.4, an increase of 32% from the 2003 rate of 4.1. Between 1994 and 1999, the counterfeit currency rate never exceeded 2 offences per 1,000 population. From 2000 to 2004, the counterfeit currency rate has averaged 3.2 offences per 1,000 population per year.

Clearance rates are low for this type of offence. In 2004, slightly more than 1% of counterfeit currency offences were cleared; the majority of which were cleared by charge.

Of the 212 persons charged with counterfeit currency offences in 2004, 69% (146) were male adults, 34% (50) were female adults with the remaining 8% (16) were youths.

Criminal Harassment

In 1993, the Criminal Code was amended to include the offence of criminal harassment. Criminal harassment, more commonly known as stalking, prohibits harassing and intimidating conduct that causes a person to fear for his or her safety or the safety of anyone known to him or her.

Criminal harassment is a distinct form of criminal activity involving a series of actions as opposed to a single isolated event. When these actions are considered individually, they often do not constitute a crime (for example, sending notes or flowers). It is when these activities instill fear of injury that they represent a pattern of behaviour that is considered criminal.

In 2004, 3,827 criminal harassment offences were reported in B.C., a 7% decrease from the 4,101 reported in 2003. Approximately 70% (2,571) of criminal harassment charges were cleared (solved) with 2,107 persons charged. Males represented almost 90% (1,866) of persons charged with criminal harassment offences.

Criminal harassment legislation prohibits harassing and intimidating conduct that causes a person to fear for his or her safety.

Criminal Harassment Survey Results

Police Services Division conducted a survey of criminal harassment incidents reported to police during 1995 and 1996. The survey revealed the following characteristics of a "typical" criminal harassment incident in B.C.:

- In eight out of ten incidents, the victim is female and the accused is male.
- Both the victim and the accused are likely between the ages of 25 and 45.
- In seven out of ten incidents, the harassment occurs at either the victim's home or the victim's place of work .
- In nearly half of the incidents there is an intimate relationship between the victim and the accused. In nine of ten incidents where an intimate relationship exists, the offender is an ex-boyfriend or an ex-spouse of the victim.
- About two-thirds of the incidents are cleared (solved). One-third of the incidents are cleared by charge while another third are cleared by other means.
- More than half of the accused charged with criminal harassment have prior criminal records. Of those accused persons with prior criminal records, half have a record for violent offences and one in four have a record for weapons offences.

Miscellaneous Other Criminal Code Offences

Those Criminal Code offences that do not have specific data collection codes are grouped in the category of "miscellaneous other" offences.

In 2004, there were 38,218 miscellaneous other Criminal Code offences reported, representing a 3% increase from the 37,166 reported in 2003.

Approximately 38% (14,553) of miscellaneous other offences were cleared in 2004, 20% (7,535) were cleared by charge and 18% (7,018) were cleared by other means. A total of 6,152 persons were charged with these types of offences, adults accounted for 93% (5,736) of persons charged.

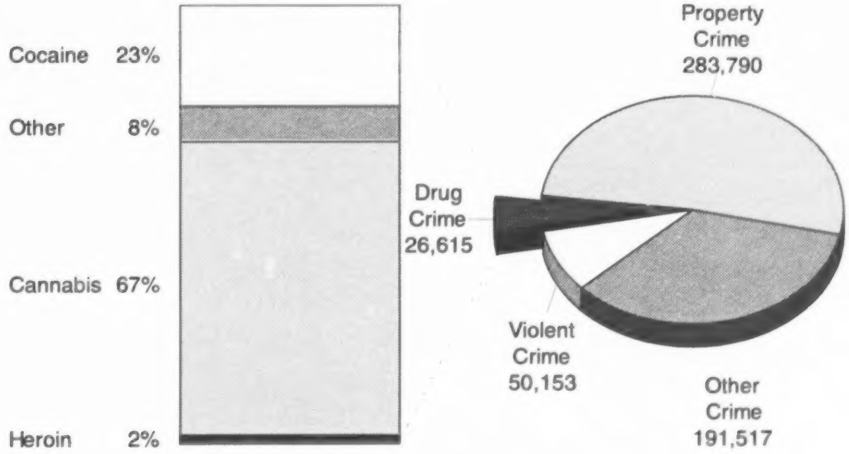
Over half of miscellaneous other Criminal Code offences are related to the uttering of threats.

Police Services Division conducted a survey of miscellaneous other offences in 1995 to determine the types of crimes that fall into this category. Results showed that 55% of the offences were uttering threats and 29% were harassing or indecent phone calls. Applications for peace bonds or restraining orders were the next largest category at 4%. The remaining 12% were various offences, including breach of peace, cruelty to animals, unlawfully in dwelling house, and possession of break-in instruments.

CHAPTER 5

Drug Crime in British Columbia

Figure 32: Drug Crime by Category, 2004.



Prior to 1997, offences involving drugs fell under two federal statutes: the Narcotic Control Act (NCA) and the Food and Drugs Act (FDA). The Narcotic Control Act dealt with illicit drugs and the Food and Drugs Act covered controlled and restricted drugs. On May 14, 1997, the NCA and Parts III and IV of the FDA were repealed and replaced by the Controlled Drugs and Substances Act (CDSA). This consolidation of drug control legislation allowed for the control of precursors (substances used to make psychoactive substances), and dealt with the forfeiture of property and goods related to illegal drug activities.

Before the proclamation of the CDSA, drug offences were reported on the basis of six drug categories: heroin, cocaine, cannabis, other drugs, controlled drugs and restricted drugs. Under the CDSA there are four categories of drug offences: heroin, cocaine, cannabis and other CDSA drugs. Generally speaking, the other CDSA drug category contains those drugs previously included in the other drugs and controlled and restricted categories. The consolidation of illicit drugs into the new categories provided by the CDSA did not commence until mid-1997. As such, 1997 was a transition year in the reporting of drug offences, and 1998 represents the first complete calendar year in the reporting of illicit drug offences under the CDSA.

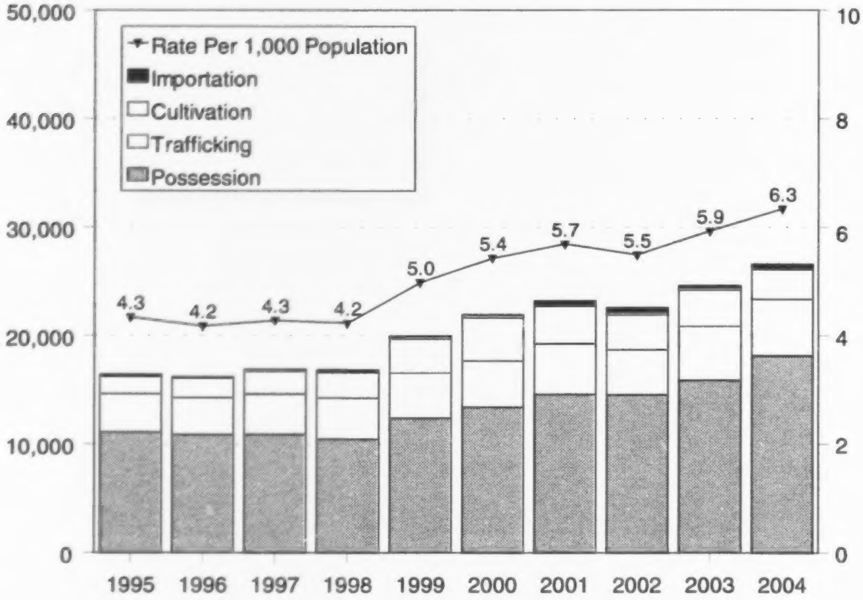
Drug Crime in 2004

The total number of drug crimes reported in 2004 was 26,615 offences, an increase of 2,005 offences or 8% from the 24,610 reported in 2003. This represents a drug crime rate of 6.3 offences per 1,000 population. During the past decade the number of reported drug offences has increased by over 60%.

It is important to note that changes in drug offence data are highly sensitive to police enforcement practices. For example, decisions by policing organizations to investigate marijuana grow operations are likely to result in an increase in the number of reported cultivation offences.

In 1997, the Narcotic Control Act and Parts III and IV of the Food and Drugs Act were repealed and replaced by the Controlled Drugs and Substances Act.

Figure 33: Number and Rate of Drug Crimes, 1995 to 2004.



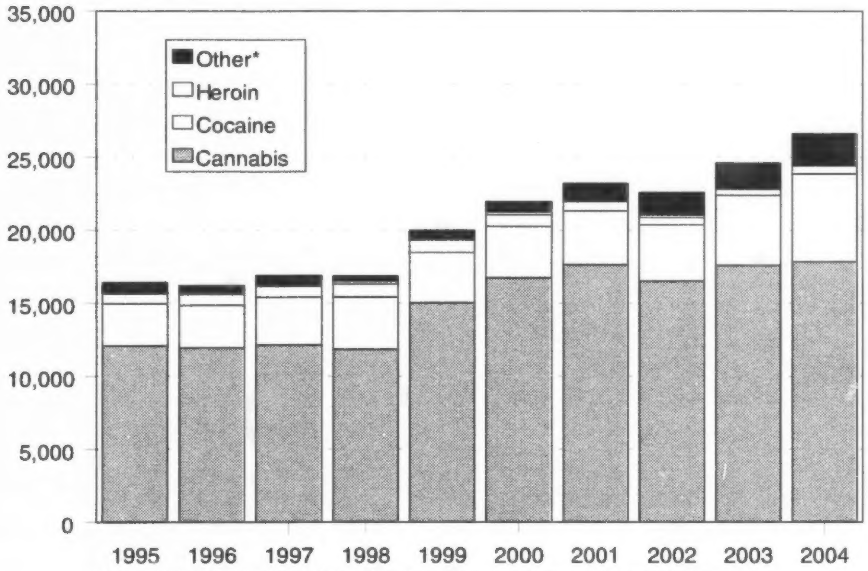
In 2004, 67% (17,852) of drug offences involved cannabis. A further 23% (6,009) involved cocaine. Of the remaining drug offences, 8% (2,210) involved other drugs and 2% (544) involved heroin (considered the most serious drug offence).

Drug crimes include the offences of possession, trafficking, importation and cultivation. In 2004, possession offences represented 68% (18,159) of all drug offences, while 20% (5,206) were for trafficking, 10% (2,765) for cultivation and 2% (485) for importation. These proportions have remained relatively stable during the past decade, although cannabis cultivation offences increased almost 74%, from 1,592 offences in 1995 to 2,765 offences in 2004.

In 2004, 68% (18,094) of drug offences were cleared. Over the last ten years the percentage of drug offences cleared has gradually declined, from a high of 81% in 1995, to a low of 68% in 2004, representing an overall decrease of 16%. Of all drug offences, 22% (5,755) were cleared by charge in 2004 and 46% (12,339) were cleared by other means. Since the early 1990s, the proportion of incidents cleared by charge has decreased, while the proportion of incidents cleared by other means has increased.

The number of drug offences cleared by charge is relatively low considering the nature of the crime. Lack of verification of ownership of seized or found drugs is the major contributing factor to low charge rates.

Figure 34: Drug Crimes by Type of Drug, 1995 to 2004.



**From 1995 to 1997 Other Includes Other Drugs, Restricted Drugs and Controlled Drugs*

Drug offence data are sensitive to police enforcement practices.

Of the 8,430 people charged with drug offences in 2004, 49% (4,102) were charged with trafficking offences, 37% (3,095) were charged with possession offences, 13% (1,091) with cultivation offences and 2% (142) were charged with importation offences.

In 2004, adults accounted for 94% (7,902) of persons charged with drug offences while youths accounted for 6% (528). Males represented 81% (6,865) of persons charged while the remaining 19% (1,565) were females.

Cannabis

Cannabis includes hashish or marijuana in either powdered, leaf, liquid or resin form. Offences involving cannabis represented approximately two-thirds of all drug offences in 2004, and have comprised most drug offences in B.C. over the past decade.

In 2004, there were 17,852 cannabis offences representing a 1% increase from the 17,602 offences reported in 2003. Between 1995 and 2004, the number of cannabis offences increased by 48%. In 2004, the rate of cannabis offences per population was 4.3 offences per 1,000 population.

In 2004, possession represented 73% (12,967), and cultivation represented 15% (2,765) while trafficking (2,051) and importation (69) represented 11% and less than 1% respectively of reported cannabis offences .

Although the proportion of possession and importation offences has remained relatively stable in the last ten years, the proportion of trafficking and cultivation offences has fluctuated. Trafficking offences accounted for a high of 12% of all cannabis offences in 2001, and a low of 9% in 1998. In 1995, cultivation offences represented 13% of cannabis offences compared with almost 20% in 2003.

In 2004, 68% (12,053) of cannabis offences were cleared, 14% (2,577) by charge and 53% (9,476) by other means.

Of the 4,498 persons charged with cannabis offences in 2004, 41% (1,838) were charged with possession offences, 34% (1,541) were charged with trafficking offences, 24% (1,091) with cultivation offences and 1% (28) with importation offences. Adults accounted for 92% (4,122) of persons charged while males accounted for 83% (3,738) of persons charged.

In 2004, 67% of drug offences involved cannabis.

Cocaine

The number of cocaine offences reported has increased by 109% since 1995. In 2004, 6,009 offences were reported, a 25% increase from the 4,796 offences reported in 2003. Between 1995 and 2002, the rate of cocaine offences per population never exceeded 1 offence per 1,000 population. In 2003 and 2004, however, the rate of cocaine offences per 1,000 population was 1.2 and 1.4 offences respectively.

In 2004, possession accounted for 57% (3,417), trafficking accounted for 43% (2,557), and importation accounted for less than 1% (35) of reported cocaine offences.

In 2004, 73% (4,377) of cocaine offences were cleared, 41% (2,456) by charge, and 32% (1,921) by other means.

Of the 3,056 persons charged with cocaine offences in 2004, 69% (2,107) were charged with trafficking offences, 30% (907) with possession offences and 1% (42) with importation offences. Adults accounted for 97% (2,957) of persons charged, and males accounted for 79% (2,404).

Heroin

In the late 1980s, the number of heroin offences was relatively stable at approximately 280 offences each year. Between 1992 and 1994, the number of heroin offences almost doubled, reaching a high of 925 offences in 1994. In the past ten years however, the number of heroin offences have fluctuated, ranging from a high of 894 in 1998 to a low of 417 offences in 2003. In 2004, there were 544 heroin offences reported, a 30% increase from the 417 reported in 2003.

In 2004, possession accounted for 67% (365), trafficking accounted for 31% (167), and importation accounted for the remaining 2% (12) of reported heroin offences. In the past ten years, the rate of heroin offences per population has never exceeded one offence per 1,000 population.

In 2004, 72% (391) of heroin offences were cleared, 37% (201) by charge and 35% (190) by other means.

Of the 269 persons charged with heroin offences in 2004, 67% (180) were charged with trafficking offences, 31% (83) with possession offences, and 2% (6) with importation offences. Adults accounted for 97% (261) of persons charged, and 83% (224) were males.

In 2004, 63% of other CDSA drug offences were for possession. Importation and trafficking represented 17% and 20% respectively.

Other CDSA Drugs

Prior to 1997, the "other drugs" category comprised all narcotics (with the exclusion of heroin, cocaine, and cannabis) described by the Narcotic Control Act, in addition to illicit drugs or substances described in Schedule F of the Food and Drugs Act. These included, for example, derivatives of the opium poppy (such as codeine, morphine and opium), antibiotics, anticoagulants, antidepressants and anabolic steroids. Beginning in mid-1997, however, the other drug category was renamed the "other CDSA drug" category and included the above noted substances along with many of the drugs previously included in the controlled and restricted drugs categories.

In 2004, there were 2,210 other drug offences reported, representing a 23% increase from the 1,795 reported in 2003. The number of offences in this category steadily increased over the last ten years. The total number of other drug offences reached a low of 194 offences in 1995 and a high of 2,210 offences reported in 2004. Despite this increase, the rate of other drug offences per population has never exceeded one offence per 1,000 population.

In 2004, possession accounted for 64% (1,410) of other CDSA drug offences, trafficking accounted for 20% (431) and importation accounted for 17% (369).

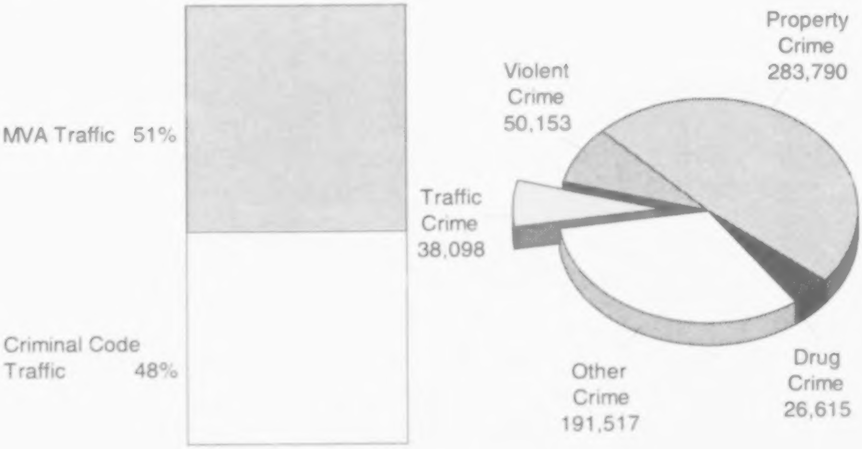
In 2004, 58% (1,273) of other drug offences were cleared, 24% (521) by charge and 34% (752) by other means.

Of the 607 persons charged with other drug offences in 2004, 45% (274) were charged with trafficking offences, 44% (267) were charged with possession offences and 11% (66) were charged with importation offences. Adults accounted for 93% (562) of persons charged and 82% (499) were males.

CHAPTER 6

Traffic Crime in British Columbia

Figure 35: Traffic Crime by Category, 2004.



In British Columbia, police report traffic offences under either the federal Criminal Code or the provincial Motor Vehicle Act. A total of 38,098 traffic offences were reported in 2004, 48% (18,465) were Criminal Code offences and the remaining 52% (19,633) were offences under the Motor Vehicle Act.

Criminal Code: Traffic

Criminal Code traffic offences are collected under the categories of impaired or dangerous operation of a vehicle (including motor vehicles, boats, vessels, and aircraft), failure to stop at the scene of an accident, driving a vehicle while prohibited from doing so, and failing or refusing to provide either a breath or blood sample upon demand by police.

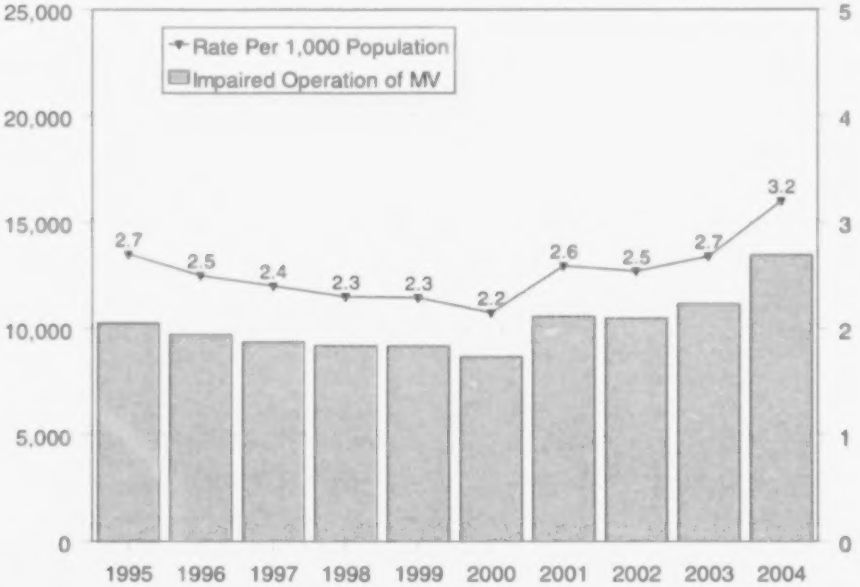
In 2004, there were 18,465 Criminal Code traffic offences reported by the police, an 18% increase from the 15,704 offences reported in 2003. From 1995 to 2000, the number of Criminal Code traffic offences reported by the police declined by 26% to a low of 12,827 offences. Since 2000, the number of Criminal Code traffic offences steadily increased and exceeded the number of offences from a decade ago, reaching a ten year high of 18,465 offences reported in 2004.

Of the 18,465 Criminal Code traffic offences reported in 2004, 73% (13,466) were reported in the impaired operation of a motor vehicle category. Over 99% (13,362) of these were for impaired operation or driving with a blood alcohol level over .08%, and slightly less than 1% were for impaired operation causing bodily harm (87) or impaired operation causing death (17).

Although impaired operation of a vehicle has historically represented the greatest proportion of Criminal Code traffic offences, the frequency of this type of offence has decreased approximately 13% over the past two decades. Increased police enforcement, anti-drinking and driving campaigns, societal pressure, and joint police and government safety initiatives are thought to have combined to reduce the number of these offences. However, it should be noted that as the number of reported Criminal Code impaired operation crimes has declined, the number of administrative prohibitions (24-hour roadside suspensions) has increased. One possible reason for the diverging trend is that a driving prohibition under provincial legislation can be issued on the suspicion by a peace officer that a person's ability to drive is impaired. In order to lay charges under the Criminal Code, on the other hand, clinically based evidence such as blood or breath samples is normally required.

In 2004, offences relating to the impaired operation of a motor vehicle represented 73% of reported Criminal Code traffic offences.

Figure 36: Number of Impaired Operation Offences, 1995 to 2004.

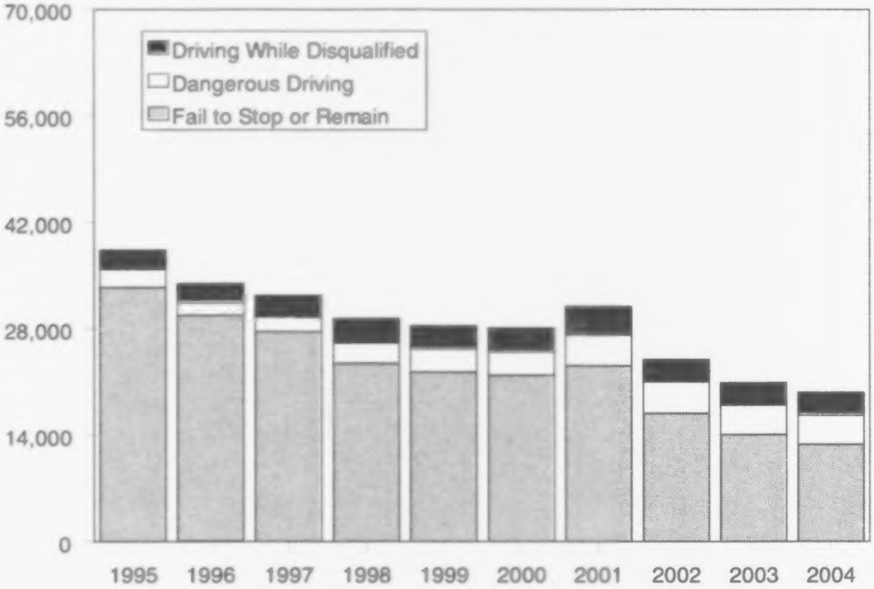


Of the remaining 4,999 Criminal Code traffic offences reported in 2004, failure to stop or remain at an accident scene accounted for 8% (1,496) of total offences reported, dangerous operation of a motor vehicle accounted for 7% (1,248), driving a motor vehicle while prohibited accounted for 5% (843), failure to provide a breath or blood sample accounted for 4% (803), and combined, dangerous and impaired operation of a boat, vessel or aircraft accounted for 3% (609).

Provincial Statutes: Traffic

Under the UCR Survey, only three categories of traffic offences covered by the provincial Motor Vehicle Act are counted. These include the following: failure to stop or remain at the scene of an accident (hit and run), dangerous driving, and driving while licence suspended.

Figure 37: Number of Provincial Statute Traffic Offences, 1995 to 2004.



In 2004, there were 19,633 Motor Vehicle Act traffic offences reported, 1,289 or 6% less than in 2003. Of these offences, 65% (12,801) were for fail to stop or remain (hit and run), 20% (3,835) were for driving without due care (dangerous driving) and 15% (2,997) were for driving with a suspended licence.

In 2004, there were 19,633 Motor Vehicle Act traffic offences, over 65% of these were for hit and run.

APPENDIX A-1 FOOTNOTES

[1] The 2004 population figure includes municipal and First Nations Reserve populations.

[2] Authorized police strengths and their associated costs have been adjusted to *exclude* secondments to other agencies (e.g. Justice Institute-B.C. Police Academy, CFSEU-BC), as reported to Police Services for calendar year 2004.

[3] Total costs refer to actual and not authorized (or budgeted) costs in calendar year 2004, as reported by each municipality, to Police Services. For the municipalities policed by the RCMP, total costs include the municipality's share of RCMP contract costs, plus those costs borne 100% by the municipality which are over and above the contract costs, such as support staff and accommodation. If a municipality included the costs of bylaw enforcement or victim services programs in their actual expenditures, these have been excluded from total costs". Total costs also do not include capital expenditures, such as major construction projects, and they are also exclusive of any revenues. Note that some variation exists between jurisdictions with respect to the cost items that are included in their policing budgets.

APPENDIX A-1 DATA QUALIFIERS

1. Canada Census occurred in 2001. The population figures for 2004 contained in this report are estimates based on 2001 Census data. The population in the 2001 Census determines which population category (5,000 to 15,000 or over 15,000 population) a municipality policed by the RCMP is in. One municipality, Sooke, exceeded 5,000 population in the 2001 Census and became responsible for its policing services in April 2002. One municipality, Salmon Arm, exceeded 15,000 population in the 2001 Census and moved from the 5,000 to 15,000 category to the over 15,000 population category. One municipality, Prince Rupert, moved from the over 15,000 category to the 5,000 to 15,000 category and one municipality, Port Hardy, moved below the 5,000 to 15,000 category and is no longer responsible for its policing services: it has reverted to a solely Provincial policing jurisdiction.
2. Population figures reflect the resident or late night population of a jurisdiction or municipality, rather than the number of people who spend some part of the day in the area either for business or pleasure purposes. Furthermore, populations do not take into account resident non-residents, i.e. cottage/chalet owners or students residing at universities or colleges whose permanent residence is within another jurisdiction.
3. Authorized police strength is based on the authorized police strength as of December 31, 2004. The authorized strength of the RCMP is obtained from RCMP "E" Division Headquarters. The authorized strength of the independent jurisdictions is collected annually from each department.
4. The offence data contained in this report have been recorded by the police on the Uniform Crime Reporting Survey (UCR). Offences are scored according to the UCR Scoring Rules. If a single criminal incident contains a number of violations of the law, then only the most serious one is recorded for UCR purposes. However, with the exception of robbery offences where one incident with multiple victims is scored as one offence, police record one offence for every victim of a violent crime, e.g. homicide, attempted murder, sexual and non-sexual assault, and abduction. Total CC Offences represents only those offences reported to, or discovered by police which, upon preliminary investigation, have been deemed to have occurred or been attempted; this data does not represent or imply a count of the number of charges laid, prosecutions conducted, informations sworn or convictions obtained.
5. CCC Offences include Criminal Code-Property, Person and Other offences. Criminal Code-Property offences include break and enters, motor vehicle thefts, theft over and less than $5000, fraud, and possession of stolen property. Criminal Code-Person offences include violent crimes such as homicides, attempted murder, sexual and non sexual assaults, robbery and abduction. Criminal Code-Other offences include prostitution, gaming and betting, possession of offensive weapons, as well as arson, bail violations, disturb the peace, and mischief and property damage (vandalism). Criminal Code-Traffic offences are not included in Total CC offences.
6. The crime rate is defined as the number of Criminal Code offences (excluding traffic offences) per 1,000 population. Population figures are estimates based on the results of the 2001 Canada Census. These figures reflect the resident population of a jurisdiction and exclude commuters, students, tourists and other part-time residents. Municipal crime rates do not necessarily reflect the relative safety of one municipality over another. More often than not, a high crime rate indicates that a municipality is a core city or tourist destination. Core cities are usually surrounded by unincorporated areas or other municipalities that have large residential populations. Core cities are also the business and entertainment centres for many people who reside outside, as well as inside, the municipality. Core cities may also have a large part-time population relative to the resident population. Part-time residents include tourists, cottage or chalet owner, students and seasonal staff. If core cities expanded their boundaries to include residential areas outside their borders, the crime rate for the combined populated area would be considerably lower than the municipality itself. Similarly, if tourist destinations included part-time residents in their population base, their crime rates would be substantially lower.

APPENDIX A-1 DATA QUALIFIERS CONTINUED

7. The case burden is defined as the number of Criminal Code offences (excluding traffic offences) per authorized police strength. Because it represents the workload per officer in each policing jurisdiction, the case burden is a better indicator of the demand for police services than either population or crime rate. The total number of Criminal Code offences in 2004, and the authorized police strength as of December 31, 2004, are used to calculate the case burden. Comparisons between the case burdens of independent municipal forces and RCMP municipal forces may be erroneous due to differences in the organizational structures of the RCMP and independent municipal forces. The RCMP municipal forces may have a relatively lower sworn strength because of the administrative support provided by "E" Division Headquarters.

8. Populations, crime rates and case burdens are only three of the many factors used to determine the strength and organization of a police force. A number of other factors, such as size, accessibility of the area to be policed, and traffic volume are also taken into consideration. Case burdens and crime rates also do not reflect the time spent by police providing general assistance to the public, or participating in crime prevention programs, or enforcing traffic laws.

Appendix A-2: Contribution to Policing by Level of Government, 2004

	Police	Population	Total Police Costs Paid By:			
Type of Force	**Strength**	**Policed**	**Mun Govt**	**Prov Govt**	**Fed Govt**	**Total**

APPENDIX A-2 FOOTNOTES

[1] Municipalities policed by the RCMP are categorized into two groups according to their population: 5,000 to 15,000 or over 15,000 population. Population figures shown are estimates based on the results of the 2001 Canada Census.

[2] The unincorporated areas of the province make no direct contribution towards their policing services. However, the rural property tax levy collected from residents serves to offset, to some degree, the cost of policing rural communities.

[3] The First Nations Administered Police Services — Kitasoo-Xaixais and Stl'atl'imx — were opened in 1999. Two others, Tsewulton and Ditidaht, which also opened in 1999, were respectively closed in 2000 and 2004. Each of these police services are autonomous and independent of the RCMP. Their costs are shared jointly between the Federal (52%) and Provincial (48%) governments.

APPENDIX A-2 DATA QUALIFIERS

1. All expenditure figures shown above for the Federal and Provincial governments represent estimated costs paid in fiscal year 2004/2005. The expenditure figures for municipalities with independent and RCMP municipal forces represent actual costs paid by them in calendar year 2004. **Federal and provincial government contributions are preliminary, pending a final reconciliation of RCMP municipal and provincial force contract costs.**

2. Expenditure figures for the 59 municipalities with RCMP municipal forces include both the contract costs, and those costs paid by the municipality which are over and above the contract costs (for example, support staff salaries and benefits, and accommodation costs). These figures exclude Bylaw enforcement and victim services program costs where municipalities have this in their policing budget. The Federal government contributions to policing include their share of municipal and provincial policing costs. These figures only represent their share of the contract costs, and exclude costs borne by the Federal government which are over and above the contract costs. These figures also exclude the costs to Canada for Federal Force members operating in B.C. **Federal government contributions are preliminary, pending a final reconciliation of RCMP municipal and provincial contract costs.**

3. Canada Census occurred in 2001. The population figures for 2004 in this report are estimates based on 2001 Census data. The population in the 2001 Census determines which population category (5,000 to 15,000 or over 15,000 population) a municipality policed by the RCMP is in. One municipality, Sooke, exceeded 5,000 population in the 2001 Census and became responsible for its policing services in April 2002. One municipality, Salmon Arm, exceeded 15,000 population in the 2001 Census and moved from the 5,000 to 15,000 category to the over 15,000 population category. One municipality, Prince Rupert, moved from the over 15,000 category to the 5,000 to 15,000 category.

4. In 2003/2004, under RCMP Policing Agreements, municipalities over 15,000 population were paying 90% of their contract policing costs, and municipalities between 5,000 and 15,000 were paying 70% of their contract costs. In the same years the Province was paying 70% of provincial policing costs. For the First Nations Administered Police Services, the Province pays 48% and the Federal government pays 52% of the total policing costs.

APPENDIX A-3 FOOTNOTES

[1] In 2004 the strength of RCMP Division Administration increased by 7 positions in the training and network administration areas. In 2003 the strength of RCMP Division Administration decreased by 4 positions in the staffing and personnel areas. In 2002 the overall strength of RCMP Division Administration decreased by 14 positions. Nineteen Firearms Registration positions ended and 5 positions were added in planning, staffing and other administration. In 2001 the overall strength of RCMP Division Administration increased by 6 positions. One position was added for overall administration; three positions were added in Human Resources, Health Services and Staff Relations, and two were added in Informatics. In 2000 the overall strength of RCMP Division Administration increased by 5 positions. Three positions were added for the BC Policing Study, one position was added for firearms registration and one position was added to the Informatics Field Support section. In 1999 the overall strength of RCMP Division Administration increased by 3 positions. In departmental administration three lawyers ("Appropriate Officer Representatives") were added; there was also a net increase of two positions dedicated to firearms registration. However, division administration lost two fitness and lifestyle advisory positions, cancelling out the two firearms registration positions. In 1998 the strength of RCMP Division Administration was increased by 18 positions: sixteen firearms registration positions and three other administrative positions were added to departmental administration; one position was decreased in the staffing and personnel services area. In 1997 the strength of RCMP Division Administration was decreased by eight positions in the areas of internal affairs, staffing and departmental administration. In 1996 the strength was decreased by twelve positions in the areas of information (informatics) and training services.

[2] In 2004 a total of 19 positions were added to Federal Criminal Law authorized strength. These were new positions in the technical operational units assisting a wide variety of federal criminal investigations. In 2003 a total of 26 positions were added to Federal Criminal Law authorized strength. There were 6 new positions for IBET (International Border Entry Integrity), 3 new positions for INSET (Integrated National Security Enforcement Team), 3 new marine security positions, 12 new drug enforcement positions (Cannabis Grow Operations and Methamphetamine Labs), and 2 more positions were added for securities fraud investigations. In 2002 a total of 46 positions were added: 18 new positions were created for IBET and 26 new positions for INSET. In 2001 the strength of Federal Criminal Law increased by seventeen positions. Eight positions were added in Customs and Excise; three positions were added for outlaw motorcycle gang investigations; and six positions were added for money laundering enforcement. In 1999 the strength of Federal Criminal Law increased by twenty-two positions. Eleven positions were added to "E" Division's criminal analysis section, three positions were added in federal protection intelligence support, five positions were added in the Vancouver criminal intelligence section, and three positions were added in district cirminal intelligence and proceeds of crime. In 1998 the strength of Federal Criminal Law decreased by one position in the area of foreign and domestic support. In 1997 the strength of Federal Criminal Law was increased by seven positions in the areas of drug enforcement and awareness, and proceeds of crime enforcement. In 1996 the strength was decreased by five positions in the area of immigration and passport services.

APPENDIX A-3 FOOTNOTES CONTINUED

[3] The RCMP First Nations Policing Program provides Aboriginal Community Constables (ACCP) and First Nations Community Policing Services (FNCPS) to various First Nations communities. In 2004 there were 45 ACCP and 28 FNCPS positions.

[4] In 1997 the strength of International Airports was decreased by 65 positions as a result of Richmond Municipal Detachment assuming policing responsibility for Vancouver International Airport from the RCMP Federal Force.

[5] In 2004 the strength of Protective Policing decreased by 10 positions for Protective Operations. In 2003 the strength of Protective Policing increased by 9 positions for Protective Operations and technological crime. In 2002 the strength of Protective Policing increased by 48 positions. There were increases of 39 positions for Protective Operations, 6 positions in Technological Crime and another 3 positions in other security units. In 2000 the overall strength of Protective Policing decreased by six positions. Three positions in Security Systems Education and six in Departmental Security were lost; these nine positions were offset by an increase of three positions in the Explosives Disposal unit. In 1998 the strength of Protective Policing decreased by four positions assigned to departmental security and security systems education. In 1997 the strength of Protective Policing increased by two positions assigned to VIP services. In 1996 the strength of Protective Policing was decreased by three positions in the area of diplomatic protection services.

[6] Provincial Force Headquarters provides specialized policing services and functions at the provincial level, e.g. log theft unit, anti-tobacco smuggling unit, unsolved homicide unit, etc. In 2004 there was an increase of 25 positions to Provincial Force Headquarters. There were 6 new positions for illegal gaming enforcement; 6 new positions for major crime investigations; 13 other positions were assigned to other criminal investigations (e.g. commerical and technological crime.) In 2003 there was an increase of 25 positions: 6 positions for illegal gaming enforcement and another six for protective details were added. Several positions were also added in the areas of commercial crime and criminal investigation. In 1999, there was a decrease of five positions in the Security Frauds Investigations office. In 1998, there was an increase of twelve positions: six for the auto theft task force, five in operational support and one for Substance Abuse Education. In 1997, there was a net increase of five positions. There were increases of twelve positions in Anti-Tobacco Smuggling, two Proceeds of Crime, three Criminal Intelligence and six Technical Services positions, but decreases of four Telecommunications and fourteen Operational Support positions. In 1996 the strength of Provincial Force Headquarters increased by thirty-eight positions: twelve of these were for the unsolved homicide squad, four were for Liquor Act enforcement, and most of the balance were for operational support.

[7] In 2004 there was an increase of 58 positions to the strength of District Headquarters. There were 39 new positions in the Lower Mainland Integrated Homicide Investigation Team (IHIT); 9 new positions in information technology and communications; 5 new positions investigating major crimes; and 5 District Headquarters administrative positions. In 1997 the RCMP restructured its eight subdivisions into four districts known as Island, North, Southwest, and Southeast. Each District Headquarters provides specialized policing services and functions at the regional level, e.g. clerical/administrative services, communication centres, patrol vessels, and air services. In 1998, there was a net decrease of seventeen positions at District Headquarters. There was a decrease of thirty-three positions in operational support: these were District, Section, and Co-ordinator positions. There were increases of seven investigation, three telecommunications, four substance abuse education and two other support positions for a total of sixteen. In 1997, there was a net increase of fifty-four positions at District Headquarters. There was an increase of thirty-three positions at Communications Centres and twenty positions in operational support due to restructuring of subdivisions into districts. There was an increase of four other positions in intelligence and other support services. There was a decrease of three positions in investigation and identification services at the District level. In 1996 there was a net increase of five positions assigned to subdivision Headquarters. There were increases of four positions in telecommunications, two in identification and three in dog squads; there were decreases of one position in operational support and three in marine services.

[8] Provincial Force Detachments provide policing services to municipalities under 5,000 population, as well as to the unincorporated areas of the Province. Provincial Force Detachments are usually named after a municipality; however, if a municipality is under 5,000 population the detachment polices not only the municipality but also the unincorporated or rural area surrounding it. If a municipality is over 5,000 population, the Provincial Force Detachment polices only the surrounding or unincorporated area. The specialized functions at Provincial Force Detachments include sworn members assigned to specialized police services at the community level, i.e. forensic identification, crime prevention, victim services, and police dogs. In 1996, as a result of changes in reporting responsibility, twenty-five positions assigned to community service (specialized) functions were transferrred from Provincial Force Detachments to District Headquarters.

[9] In 2004 the authorized strength for Traffic Enforcement decreased by 38 positions as photo radar positions were redeployed. In 2003 the authorized strength for Traffic Enforcement decreased by 27 positions as photo radar positions were redeployed. In 1999 the strength for Traffic Enforcement was increased by five photo radar positions and decreased by one traffic services position at "E" Division. Therefore, there was a net increase of four positions in dedicated traffic enforcement. In 1998 the strength for Traffic Enforcement was increased by two photo radar positions. In 1997 there was a net increase in the strength for Traffic Enforcement of one position (net decrease of one Highway Patrol and increase of two Traffic NCO/Analyst positions). In 1996 the strength for Traffic enforcement was increased by forty-two Photo Radar and two Highway Patrol positions at detachments, but decreased by ten Traffic NCO and Analyst positions and four Highway Patrol positions not reportable to detachments, for a net gain of thirty positions.

[10] In 1981 Canada Census indicated that seven municipalities — Coldstream, Fernie, North Saanich, Parksville, Pitt Meadows, Port Hardy, and Revelstoke — exceeded 5,000 population. The 1986 Canada Census indicated that the Municipality of Colwood was also over 5,000 population. Since their populations were officially over 5,000 persons, these municipalities pursuant to the Police Act and Municipal Act became responsible for their police services. Instead of contracting for RCMP Municipal police services, it was agreed that the Provincial Force would "extend" police services to these eight municipalities on a fee for service basis, and the municipalities would reimburse the Province for the Provincial Force police services they received. In 1992 seven of these municipalities contracted for RCMP Municipal police services; the eight municipality, Fernie, entered into an RCMP Municipal contract in 1994. In 1997 Fernie reverted to a provincial policing jurisdiction based on the result of the 1996 Canada Census which placed its population below 5,000 persons. Five municipalities — Hope, Ladysmith, Lake Country, Spallumcheen, and Whistler — exceeded 5,000 population in the 1996 Census, however, and became responsible for their policing services on April 1, 1997. Sooke became responsible for its policing services and Port Hardy reverted to a provincial policing jurisdiction on April 1, 2002 based on the results of the 2001 Canada Census.

APPENDIX A-3 FOOTNOTES CONTINUED

[11] In British Columbia a municipality under the Police Act and Municipal Act becomes responsible for its police services when the Canada Census indicates its population exceeds 5,000 persons. In 2004, there were eleven "independent" police departments serving twelve municipalities and fifty-nine municipalities contracting with the RCMP for municipal police services.

[12] The First Nations Administered Police Services — Kitasoo-Xaixais and Stl'atl'imx — were opened in 1999. Two others, Tsewulton and Ditidaht, which also opened in 1999, were respectively closed in 2000 and 2004. Each of these police services are autonomous and independent of the RCMP.

APPENDIX A-3 DATA QUALIFIERS

1. The police strength of the RCMP is obtained from the HRMIS/PARADE Reports, and is based on the authorized strength as of December 31st of each calendar year. Authorized strength includes all sworn members and sworn civilian members. Police strength for the RCMP forces does not include non-sworn civilian support staff, bylaw enforcement officers, or RCMP Auxiliary Police.

2. The police strength of the Independent Municipal Forces is submitted annually to Police Services, and is based on the authorized strength as of December 31st of each calendar year. Police strength for the Independent Forces does not include non-sworn civilian support staff, bylaw enforcement officers or reserve police officers.

APPENDIX A-4 AND A-5 FOOTNOTES

[1] The following policing jurisdictions have been opened or closed subsequent to Canada Census results or departmental amalgamations. Where jurisdictions have been amalgamated, the data shown reflect the total reporting for both the present jurisdiction and the absorbed jurisdiction up to and including the year in which the jurisdictions were amalgamated.

- In 1996, as a result of Mackenzie RCMP Provincial detachment being restructured, Tsay Keh Dene RCMP Provincial detachment was opened.
- In 1997, Field RCMP Provincial detachment was closed with Golden RCMP Provincial detachment assuming policing responsibilities for the area. In addition, five RCMP municipal detachments were opened subsequent to the 1996 Canada Census which showed their populations to be more than 5,000 persons. The detachments are Spallumcheen, Lake Country, Hope, Whistler and Ladysmith.
- In 1999, Radium Hot Springs Provincial detachment was closed with Columbia Valley RCMP Provincial detachment assuming policing responsibilities for the area.
- In 2000, as a result of Fort St. James RCMP Provincial detachment being restructured, Takla Landing RCMP Provincial detachment was opened.
- In 2002, two amalgamations occurred: Rossland, Fruitvale and Trail RCMP Provincial detachments were amalgamated as Trail and Greater District RCMP Provincial detachment; and Tahsis and Gold River RCMP Provincial detachments were amalgamated as Nootka Sound RCMP Provincial detachment. In addition, one RCMP Municipal detachment was opened and one was closed as a result of the 2001 Canada Census: Sooke RCMP Municipal detachment with a population of more than 5,000 persons was opened while Port Hardy RCMP Municipal detachment with a population of less than 5,000 persons was closed.
- In 2003, one restructure and four amalgamations occurred: Fernie, Sparwood and Elkford RCMP Provincial detachments were restructured as Elk Valley RCMP Provincial detachment; Sechelt and Gibsons RCMP Provincial detachments were amalgamated as Sunshine Coast RCMP Provincial detachment; Grand Forks and Midway RCMP Provincial detachments were amalgamated as Boundary RCMP Provincial detachment; Keremeos, Oliver and Osoyoos RCMP Provincial detachments were amalgamated as South Okanagan RCMP Provincial detachment; and the Esquimalt Police Department (Independent Municipal Force) was amalgamated into the Victoria Police Department.
- In 2004, Ditidaht FNAPS was closed with Lake Cowichan RCMP Provincial detachment assuming policing responsibilities for the area.

[2] CCC offences data include estimates for jurisdictions covered by the "West Kootenay's PRIME Sign-on". These include Nakusp Prov, Castlegar Mun and Prov, Kaslo Prov, Trail Mun and Trail & Greater District Prov, Boundary Prov, Nelson Prov, Slocan Lake Prov and Salmo Prov. For each jurisdiction, the estimates cover the phase-in period required for PRIME-BC. The estimates for Nakusp Prov, Castlegar Prov and Kaslo Prov cover the reporting period of April to December 2004 while estimates for the remaining jurisdictions cover the reporting period of May to December 2004. The estimates are based on each Department's 2003 reporting under the UCR Survey.

APPENDIX A-4 AND A-5 FOOTNOTES CONTINUED

[3] Provincial parks are located within the policing jurisdictions of North Vancouver Prov and Ridge Meadows Prov. The crime rates for both of these policing jurisdictions are inflated due to small residential populations and the relatively large amount of property crimes occurring within these parks. As a result, crime rates for these jurisdictions have not been calculated.

[4] Population figures also include First Nations Reserve populations.

[5] The First Nations Administered Police Services — Kitasoo-Xaixais and Stl'atl'imx — were opened in 1999. Two others, Tsewulton and Ditidaht, which also opened in 1999, were respectively closed in 2000 and 2004. Each of these police services are autonomous and independent of the RCMP.

[6] The Policing Jurisdictions CCC offences Total does not include reporting by Canadian Pacific Railway Police, Canadian National Railway Police and other specialized units.

APPENDIX A-4 AND A-5 DATA QUALIFIERS

1. The Provincial Force provides policing services to municipalities under 5,000 population, as well as to the unincorporated areas of the province. If a municipality is under 5,000 population, the Provincial Force polices not only the municipality but also the unincorporated or rural area surrounding it. If a municipality is over 5,000 population, the Provincial Force polices only the surrounding unincorporated area.

2. The police strength for municipal force jurisdictions (Mun) represents the number of sworn members assigned to a detachment or municipal department but does not include civilian members, support staff and bylaw enforcement officers. The police strength for provincial force jurisdictions (Prov) represents the number of police assigned to general duty and general investigation functions but does not include police assigned to specialized functions such as highway patrol or forensic identification.

3. The offence data contained in Appendix A5 have been recorded by the police according to the Uniform Crime Reporting (UCR) Survey crime scoring rules (see section "Overview of Crime Data Collection Procedures in British Columbia" in this report for a detailed explanation of these rules).

4. The crime rate is defined as the number of Criminal Code offences (excluding traffic offences) per 1,000 population. Population figures are estimates based on the results of the 2001 Canada Census. These figures reflect the resident population of a jurisdiction and exclude commuters, students, tourists and other part-time residents. Municipal crime rates do not necessarily reflect the relative safety of one municipality over another. More often than not, a high crime rate indicates that a municipality is a core city or tourist destination. Core cities are usually surrounded by unincorporated areas or other municipalities that have large residential populations. Core cities are also the business and entertainment centres for many people who reside outside, as well as inside, the municipality. Core cities may also have a large part-time population relative to the resident population. Part-time residents include tourists, cottage or chalet owner, students and seasonal staff. If core cities expanded their boundaries to include residential areas outside their borders, the crime rate for the combined populated area would be considerably lower than the municipality itself. Similarly, if tourist destinations included part-time residents in their population base, their crime rates would be substantially lower.

5. The case burden is defined as the number of Criminal Code offences (excluding traffic offences) per authorized police strength. Because it represents the workload per officer in each policing jurisdiction, the case burden is a better indicator of the demand for police services than either population or crime rate. In Appendix A5, the total number of Criminal Code offences in 2004, and the authorized police strength as of December 31, 2004, are used to calculate the case burden. Comparisons between the case burdens of independent municipal forces and RCMP municipal forces may be erroneous due to differences in the organizational structures of the RCMP and independent municipal forces. The RCMP municipal forces may have a relatively lower sworn strength because of the administrative support provided by "E" Division Headquarters.

6. Case burden, crime rate and population are only three of the many factors used to determine the strength and organization of a police force. A number of other factors, such as size, accessibility of the area to be policed and traffic volume are also take into consideration. Case burden and crime rate also do not reflect the amount of time spent by police providing general assistance to the public, participating in crime prevention programs, or enforcing traffic laws.

Footnotes and Data Qualifiers for this report appear on page 112

APPENDIX B FOOTNOTES

[1] The offence data shown include estimates for jurisdictions covered by the "West Kootenay's PRIME Sign-on". These include Nakusp Prov, Castlegar Mun and Prov, Kaslo Prov, Trail Mun and Trail & Greater District Prov, Boundary Prov, Nelson Prov, Slocan Lake Prov and Salmo Prov. For each jurisdiction, the estimates cover the phase-in period required for PRIME-BC. The estimates for Nakusp Prov, Castlegar Prov and Kaslo Prov cover the reporting period of April to December 2004 while estimates for the remaining jurisdictions cover the reporting period of May to December 2004. The estimates are based on each Department's 2003 reporting under the UCR Survey.

[2] Population figures also include First Nations Reserve populations.

[3] Provincial parks are located within the policing jurisdictions of North Vancouver Prov and Ridge Meadows Prov. The crime rates for both of these policing jurisdictions are inflated due to small residential populations and the relatively large amount of property crimes occurring within these parks. As a result, crime rates for these jurisdictions have not been calculated.

[4] The First Nations Administered Police Services — Kitasoo-Xaixais, and Stl'atl'imx — were opened in 1999. Each of these police services is autonomous and independent of the RCMP.

APPENDIX B DATA QUALIFIERS

1. The offence data contained in Appendix B have been recorded by the police according to the Uniform Crime Reporting (UCR) Survey crime scoring rules (see section "Overview of Crime Data Collection Procedures in British Columbia" in this report for a detailed explanation of these rules).

2. The crime rate is defined as the number of Criminal Code offences (excluding traffic offences) per 1,000 population. Population figures are estimates based on the results of the 2001 Canada Census. These figures reflect the "resident" population of a jurisdiction and exclude commuters, students, tourists and other part-time residents. Municipal crime rates do not necessarily reflect the relative safety of one municipality over another. More often than not, a high crime rate indicates that a municipality is a core city or tourist destination. Core cities are usually surrounded by unincorporated areas or other municipalities that have large residential populations. Core cities are also the business and entertainment centres for many people who reside outside, as well as inside, the municipality. Core cities may also have a large "part-time" population relative to the resident population. Part-time residents include tourists, cottage or chalet owners, students and seasonal staff. If core cities expanded their boundaries to include residential areas outside their borders, the crime rate for the combined populated area would be considerably lower than the municipality itself. Similarly, if tourist destinations included part-time residents in their population base, their crime rates would be substantially lower.

3. The police strength for municipal force jurisdictions (Mun) represents the number of sworn members assigned to a detachment or municipal department but does not include civilian members, support staff and bylaw enforcement officers. The police strength for provincial force jurisdictions (Prov) represents the number of police assigned to general duty and general investigation functions but does not include police assigned to specialized functions such as highway patrol or forensic identification.

4. The British Columbia total includes additional reporting from Canadian National Railway Police, Canadian Pacific Railway Police and other specialized units.

APPENDIX C FOOTNOTES

[1] The following years contain crime data estimates.

- In 1995, the data include estimates for the City of Vancouver. The estimates cover the reporting months of August and October 1995 and are based on the Department's "Monthly Activity Reports" for each month.
- In 2001, the data include estimates for the Cities of Vancouver and Port Moody. For each jurisdiction, the estimates cover the phase-in period required for PRIME-BC. The estimates for Vancouver cover the reporting period of February to April 2001 and are based on the Department's 2000 reporting under the UCR Incident-Based Survey. The estimates for Port Moody cover the reporting period of March to April 2001 and are based on the Department's 2000 reporting under the UCR Survey.
- In 2003, the data include estimates for the Cities of Victoria and Richmond. The estimates for Victoria cover the reporting month of December 2003, while the estimates for Richmond cover the reporting months of May and July 2003. The estimates are based on each Department's 2002 reporting under the UCR Survey.
- In 2004, the data include estimates for the jurisdictions covered by the "West Kootenay's PRIME Sign-on". These include Nakusp Prov, Castlegar Mun and Prov, Kaslo Prov, Trail Mun and Trail & Greater District Prov, Boundary Prov, Nelson Prov, Slocan Lake Prov and Salmo Prov. For each jurisdiction, the estimates cover the phase-in period required for PRIME-BC. The estimates for Nakusp Prov, Castlegar Prov and Kaslo Prov cover the reporting period of April to December 2004 while estimates for the remaining jurisdictions cover the reporting period of May to December 2004. The estimates are based on each Department's 2003 reporting under the UCR Survey.

[2] Theft offences are classified according to the value of the goods stolen. Theft offences are divided into over and under $5,000 categories. The data shown are the total of these categories.

[3] The incidence of prostitution offences is highly sensitive to changes in police enforcement practices and it is this factor that largely contributes to any increase or decrease in these offences.

[4] In 1999, RCMP Commercial Crime Sections incorrectly reported counterfeit currency offences. As a result, estimates of RCMP Commercial Crime counterfeit currency data for this reporting period are included in the figures shown.

[5] Mischief and property damage offences are classified according to the value of damage done to property. Mischief and property damage offences are divided into over and under $5,000 categories. The data shown are the total of these categories.

[6] OCC: Other offences include Criminal Code offences not covered by a specific UCR offence category (e.g., breach of probation, extortion, computer/data mischief, uttering threats, criminal harassment, etc.).

[7] In June 1997, the Controlled Drugs and Substances Act (CDSA) came into effect. The CDSA consolidates the Narcotic Control Act (NCA) and Parts III and IV, and Schedules F, G, and H of the Food and Drugs Act (FDA). Prior to the proclamation of the CDSA, drug offences were reported on the basis of six drug categories: heroin, cocaine, cannabis, other drugs, controlled drugs and restricted drugs. Under the CDSA there are now four categories of drug offences: heroin, cocaine, cannabis and other CDSA drugs. Generally speaking, the other CDSA drug category contains those drugs previously included in the controlled, restricted, and other drug categories. The consolidation of illicit drugs into the new categories provided by the CDSA did not commence until mid-1997. As such, 1997 is a transition year in the reporting of drug offences. The 1997 data contain approximately half a year of data reported under the drug categories provided by the NCA/FDA and half a year of reporting under the new CDSA drug categories. Consequently, data anomalies are apparent in the other drug, controlled drug and restricted drug categories.

[8] In December 1998, the Firearms Act came into effect. As a result, a new federal statute offence category called the Firearms Act was added to the UCR Survey. This category covered all non–Criminal Code weapons offences reported under the new legislation. As a result of the new legislation, the descriptions and contents of the UCR offence categories relating to Criminal Code weapons offences were changed. In 1999 offensive weapons data have been collected under the new categories of firearms usage, weapons possession and trafficking, and other weapons offences.

[9] The incidence of offences under federal statutes (excluding drugs) and provincial statutes (excluding traffic) is highly sensitive to changes in police enforcement practices and it is this factor that largely contributes to any increase or decrease in these offences.

[10] The following years contain traffic data estimates.

- In 1995, the data include estimates for the City of Vancouver. The estimates cover the reporting periods of August and October 1995 and are based on the Vancouver Police Department's "Monthly Activity Report" for each month.
- In 2001, the data include estimates for the Cities of Vancouver and Port Moody. For each jurisdiction, the estimates cover the phase-in period required for PRIME-BC. The estimates for Vancouver cover the reporting period of February to April 2001 and are based on the Vancouver Police Department's 2000 reporting under the UCR Incident-Based Survey. The estimates for Port Moody cover the reporting period of March to April 2001 and are based on the Port Moody Police Department's 2000 reporting under the UCR Survey.
- In 2003, the data include estimates for the Cities of Victoria and Richmond. The estimates for Victoria cover the reporting month of December 2003, while the estimates for Richmond cover the reporting months of May and July 2003. The estimates are based on each Department's 2002 reporting under the UCR Survey.
- In 2004, the data include estimates for the jurisdictions covered by the "West Kootenay's PRIME Sign-on". These include Nakusp Prov, Castlegar Mun and Prov, Kaslo Prov, Trail Mun and Trail & Greater District Prov, Boundary Prov, Nelson Prov, Slocan Lake Prov and Salmo Prov. For each jurisdiction, the estimates cover the phase-in period required for PRIME-BC. The estimates for Nakusp Prov, Castlegar Prov and Kaslo Prov cover the reporting period of April to December 2004 while estimates for the remaining jurisdictions cover the reporting period of May to December 2004. The estimates are based on each Department's 2003 reporting under the UCR Survey.

[11] In 2004, the Vancouver Police Department revised its reporting procedures relating to incidents of impaired operation. As a result of those revisions, the department now reports not only those incidents resulting in charges, but also those incidents cleared by other means through the issuance of roadside suspensions. This situation resulted in almost 2,000 additional impaired operation offences being reported in 2004.

APPENDIX C DATA QUALIFIERS

1. The offence, clearance, and persons charged data contained in Appendices C1 to C7 have been recorded by the police according to the Uniform Crime Reporting (UCR) Survey crime scoring rules (see section "Overview of Crime Data Collection Procedures in British Columbia" in this report for a detailed explanation of these rules).

2. The offence data contained in Appendix C8 have been recorded by the police according to the Uniform Crime Reporting (UCR) Survey traffic scoring rules. If a single criminal traffic incident contains a number of violations of the law, only the most serious one is recorded for UCR purposes (MSO Rule). The only exception to the MSO Rule is in incidents where an offender is charged with impaired operation and failure to provide either a breath or blood sample. In this situation both offences would be scored and cleared by charge, but only the more serious offence of impaired operation would reflect persons charged data.

3. The number of traffic offences represents only those traffic offences reported to or discovered by police which, upon preliminary investigation, have been deemed to have occurred or been attempted. These data do not represent or imply a count of the number of charges laid, prosecutions conducted, informations sworn or convictions obtained. Parking violations or those traffic violations normally dealt with through ticket procedures, i.e., violation tickets (VTs), are not included in any of the offence categories contained in Appendix C8.

4. The crime rate is defined as the number of Criminal Code offences (excluding traffic offences) per 1,000 population. Population figures are estimates based on the results of the 2001 Canada Census.

5. The number of offences cleared represents the number of offences solved by the police. Offences are cleared by charge when the police file a Report to Crown counsel (RCC) recommending charges. This does not necessarily imply the swearing of an information or prosecution as Crown may return the case to police due to insufficient evidence or take no further action. Offences are cleared otherwise when the police have identified an offender and have enough evidence to support a charge, but do not recommend charges. Offences are cleared otherwise in specific situations, such as, the offender was under 12 years of age, the victim was uncooperative, the offender had diplomatic immunity, or the offender was previously sentenced for similar crimes. **It should be noted that in 2000, the RCMP implemented PIRS reporting changes governing the clearance of an offence by other means. These changes stipulated that records could no longer be validated and cleared by other means without police inputting a suspect's name and date of birth. As a result, from 2000 onward, the number and rate of offences cleared, and those cleared by other means has decreased.**

6. The clearance rate is defined as the number of offences solved by police as a percentage of the number of offences reported by police. Caution should be used in the interpretation of clearance rates because the number of offences reported and the number of offences cleared within the same calendar year are not necessarily linked. Offences may be cleared or considered solved many months or even years after they are reported to police. Consequently, within the same reporting year, it is possible that the number of cleared offences exceeds the actual number of offences, resulting in clearance rates of over 100%.

7. The number of persons charged represents the number of people for whom the police have filed a Report to Crown counsel (RCC) alleging responsibility for an offence. An RCC does not necessarily imply the swearing of an information, or the prosecution or conviction of an individual as the Crown may return the case to police due to insufficient evidence, take no further action, approve diversion or alternative measures, or in the case of young offenders (youths), issue a letter of caution. Under the provisions of the Young Offenders Act, a young offender is defined as any individual under 18 years and over 11 years of age.

Footnotes and Data Qualifiers for this report appear on page 190

APPENDIX D FOOTNOTES

[1] The following policing jurisdictions have been opened or closed subsequent to Canada Census results or departmental amalgamations. Where jurisdictions have been amalgamated, the data shown reflect the total reporting for both the present jurisdiction and the absorbed jurisdiction up to and including the year in which the jurisdictions were amalgamated.

- In 1996, as a result of Mackenzie RCMP Provincial detachment being restructured, Tsay Keh Dene RCMP Provincial detachment was opened.
- In 1997, Field RCMP Provincial detachment was closed with Golden RCMP Provincial detachment assuming policing responsibilities for the area. In addition, five RCMP municipal detachments were opened subsequent to the 1996 Canada Census which showed their populations to be more than 5,000 persons. The detachments are Spallumcheen, Lake Country, Hope, Whistler and Ladysmith.
- In 1999, Radium Hot Springs Provincial detachment was closed with Columbia Valley RCMP Provincial detachment assuming policing responsibilities for the area.
- In 2000, as a result of Fort St. James RCMP Provincial detachment being restructured, Takla Landing RCMP Provincial detachment was opened.
- In 2002, two amalgamations occurred: Rossland, Fruitvale and Trail RCMP Provincial detachments were amalgamated as Trail and Greater District RCMP Provincial detachment; and Tahsis and Gold River RCMP Provincial detachments were amalgamated as Nootka Sound RCMP Provincial detachment. In addition, one RCMP municipal detachment was opened and one was closed as a result of the 2001 Canada Census: Sooke RCMP Municipal detachment with a population of more than 5,000 persons was opened while Port Hardy RCMP Municipal detachment with a population of less than 5,000 persons was closed.
- In 2003, one restructure and four amalgamations occurred: Fernie, Sparwood and Elkford RCMP Provincial detachments were restructured as Elk Valley RCMP Provincial detachment; Sechelt and Gibsons RCMP Provincial detachments were amalgamated as Sunshine Coast RCMP Provincial detachment; Grand Forks and Midway RCMP Provincial detachments were amalgamated as Boundary RCMP Provincial detachment; Keremeos, Oliver and Osoyoos RCMP Provincial detachments were amalgamated as South Okanagan RCMP Provincial detachment; and the Esquimalt Police Department (Independent Municipal Force) was amalgamated into the Victoria Police Department.
- In 2004, Ditidaht FNAPS was closed with Lake Cowichan RCMP Provincial detachment assuming policing responsibilities for the area.

[2] The following years contain crime data estimates.

- In 1995, the data include estimates for the City of Vancouver. The estimates cover the reporting months of August and October 1995 and are based on the Department's "Monthly Activity Reports" for each month.
- In 2001, the data include estimates for the Cities of Vancouver and Port Moody. For each jurisdiction, the estimates cover the phase-in period required for PRIME-BC. The estimates for Vancouver cover the reporting period of February to April 2001 and are based on the Department's 2000 reporting under the UCR Incident-Based Survey. The estimates for Port Moody cover the reporting period of March to April 2001 and are based on the Department's 2000 reporting under the UCR Survey.
- In 2003, the data include estimates for the Cities of Victoria and Richmond. The estimates for Victoria cover the reporting month of December 2003, while the estimates for Richmond cover the reporting months of May and July 2003. The estimates are based on each Department's 2002 reporting under the UCR Survey.
- In 2004, the data include estimates for the jurisdictions covered by the "West Kootenay's PRIME Sign-on". These include Nakusp Prov, Castlegar Mun and Prov, Kaslo Prov, Trail Mun and Trail & Greater District Prov, Boundary Prov, Nelson Prov, Slocan Lake Prov and Salmo Prov. For each jurisdiction, the estimates cover the phase-in period required for PRIME-BC. The estimates for Nakusp Prov, Castlegar Prov and Kaslo Prov cover the reporting period of April to December 2004 while estimates for the remaining jurisdictions cover the reporting period of May to December 2004. The estimates are based on each Department's 2003 reporting under the UCR Survey.

[3] Provincial parks are located within the policing jurisdictions of North Vancouver Prov and Ridge Meadows Prov. The crime rates for both of these policing jurisdictions are inflated due to small residential populations and the relatively large amount of property crimes occurring within these parks. As a result, crime rates for these jurisdictions have not been calculated.

[4] Population figures also include First Nations Reserve populations.

[5] The First Nations Administered Police Services — Kitasoo-Xaixais, and Stl'atl'imx — were opened in 1999. As a result, 1999 was a transition year with full reporting beginning in 2000. In addition, two other FNAPS — Tsewulton and Ditidaht — which also opened in 1999, were respectively closed in 2000 and 2004. Each of these police services is autonomous and independent of the RCMP.

APPENDIX D DATA QUALIFIERS

1. The offence data contained in Appendices D1 to D13 have been recorded by the police according to the Uniform Crime Reporting (UCR) Survey crime scoring rules (see section "Overview of Crime Data Collection Procedures in British Columbia" in this report for a detailed explanation of these rules).

2. The crime rate is defined as the number of Criminal Code offences (excluding traffic offences) per 1,000 population. Population figures are based on the results of Canada Census, which is conducted every five years. Canada Census occurred in 1996 and 2001; population figures for intervening years are estimates based on Census data. These figures reflect the "resident" population of a jurisdiction and exclude commuters, students, tourists and other part-time residents. Municipal crime rates do not necessarily reflect the relative safety of one municipality over another. More often than not, a high crime rate indicates that a municipality is a core city or tourist destination. Core cities are also the business and entertainment centres for many people who reside outside, as well as inside, the municipality. Core cities may also have a large "part-time" population relative to the resident population. Part-time residents include tourists, cottage or chalet owners, students and seasonal staff. If core cities expanded their boundaries to include residential areas outside their borders, the crime rate for the combined populated area would be considerably lower than the municipality itself. Similarly, if tourist destinations included part-time residents in their population base, their crime rates would be substantially lower.

3. The number of sexual offences includes level 1 sexual assault (least amount of bodily harm), level 2 sexual assault (involving bodily harm/weapon), level 3 sexual assault (aggravated), and other sexual offences including sexual interference, invitation to sexual touching, sexual exploitation and incest.

4. The number of assaults (non-sexual) includes level 1 assault (least amount of bodily harm), level 2 assault (involving bodily harm/weapon), level 3 assault (aggravated), unlawful bodily harm, shoot with intent, assault police, assault other officer and other assaults including poisoning and torture.

5. The number of break and enter offences includes break and enter (business premises), break and enter (residence), and other break and enter offences including breaking into trains, box-cars, unattached trailers and storage lockers.

6. The number of motor vehicle thefts includes thefts of automobiles, trucks, motorcycles, and other motor vehicles including motorized snow vehicles, and self-propelled farming and construction implements.

7. The number of thefts includes bicycle theft, theft from motor vehicle, shoplifting and other theft. Thefts are divided into over and under $5,000 categories.

8. The number of mischief and property damage offences (vandalism) includes mischief and property damage over $5,000, and mischief and property damage under $5,000.

9. The B.C. total includes additional reporting from Canadian National Railway Police, Canadian Pacific Railway Police and other specialized units.
